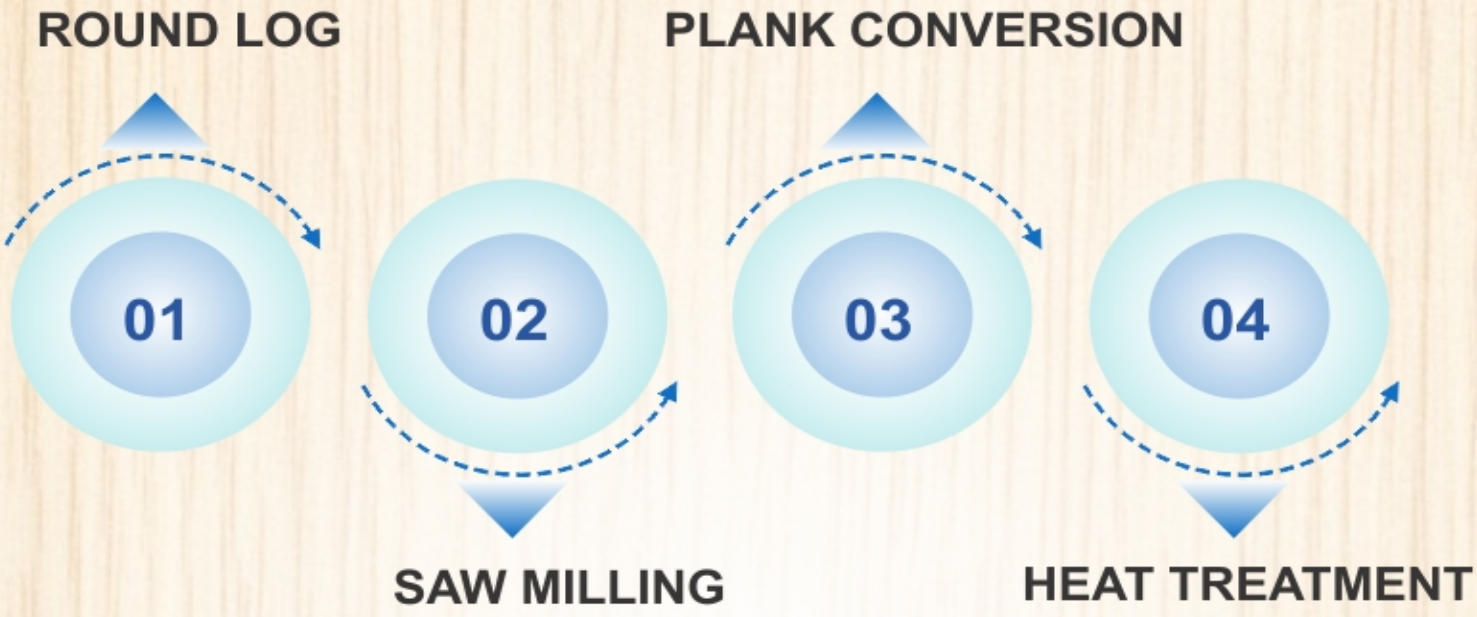
# 07 NEW LAUNCH

- Launched EMVP Material for Packaging first in India.
- What is EMVP? It is Engineered Multi veneer Plywood.
- EMVP offers several advantages over typical milled lumber: Made in a factory under controlled specifications, it is stronger, straighter, and more uniform.
- Due to its composite nature, it is much less likely than conventional lumber to warp, twist, bow, or shrink.

# 08 SERVICES OFFERED

- Free delivery of Wooden Packaging Products, we have own transportation system to support customer on time delivery.
- We are providing team for onsite support for Packing and assembling.
- Designing and manufacturing of customized Packaging according to customer specifications.
- Prompt and Assured 24X7 customer support.

# 09 FLOW OF PROCESS



# 10 QUALITY & QUANTITY TOGETHER

Combining technology with expertise, Quantity with Quality, We are engaged in offering optimum quality Wooden Packaging Products & Services. Today, we are considered as one of the most prominent manufacturers and suppliers of Wooden products in our domain, throughout India.

However, we are also looking forward to export our products in global markets as well. To accomplish the same, we have nurtured a well established distribution network that is spread in every nook and corner of the country as well as abroad.

We've regularly got appreciation awards from our clients(Due to exemplary work during flood situations, power cuts, etc.)

# 11 HEAT TREATMENT - GREENER & SAFER

- Fumigation(MB) is hazardous to the workforce & environment; while HT is safe for people and environment.
- Fumigation require 24 hours quarantine; while heat treatment requires high temperature treatment for just half an hour. Hence time efficient.
- Numerous checking/sampling points for fumigants under the process, while in HT process is precise and least tedious.
- Fumigation bear the use of fumigants are susceptible to fumigant resistant pest characteristics, but HT takes away any such scope.
- Termite extermination by HT is a greener way- better way!
