## Industrial Washing Machine

Our Industrial Washing Machine makes possible to clean large volume of garments & linens at one time.

A rigid construction made by heavy & high quality stainless steel.

The inner basket, the outer drum end plates, safety guards and control panel are constructed using stainless steel.

The reduction pulley system or gear box with pulley ensures a smooth and soft drive.

Hot forged end flange shafts long life.

Unique design which consists of raising the door height above the center of the drum, increases liquor holding capacity, which leads to better loading ratios.

Calibrated level indicator to control water level.

Large cast-iron drainage ensures quick release of water and very low maintenance.

## Hydro Extractor :

Our Hydro extractor machines are designed to remove excess water swiftly with minimum vibration and noise.

The perforated basket is made of stainless steel in standard size and in different gauges according to the size of the machine. It consists of top flange made of stainless steel and bottom flange of robust cast iron lined with stainless steel sheet, which is well balanced statistically and dynamically. With 3-leg and suspension structure, the machine has good anti-vibration efficiency. It is equipped with starting wheel to protect the motor.
