Our Product

Potash Feldspar Powder

From the first day of our inception, we manufacture and supply the premium quality of Potash Feldspar Powder. Processed using high grade ingredient, the offered potash feldspar power is known for its chemical stability, high purity, optimum effectiveness and longer shelf life. To ensure safe transportation, the offered potash feldspar powder is rendered by us with standardized packaging.

Sodium Feldspar Powder

To meet the precise needs and requirements of our customers, we manufacture, supply and wholesale the finest quality of Sodium Feldspar Powder. The offered sodium feldspar powder is highly demanded for preparation of enamel and glass. As a quality focused name, the quality of the sodium feldspar powder is never compromised at our end.

Quartz Grits

We have gained immense expertise in offering a superior quality Quartz Gritz that are processed from high grade raw material keeping in mind quality standards. These gritz are used for Glass, Paints Industry, Chemicals, and mix in concrete. Offered gritz are large enough to show textural properties in a clear enough context. Offered Quartz Gritz are stringently checked by our quality analysts on defined industry parameters to assure its optimum effectiveness.

Our Product

Quartz Granules

Quartz Granules are the most abundant mineral in the earth and we are one of the prominent suppliers of it. Offered in a variety of colours and forms, our quality proved that Quartz is twined with crystals to make them appear substantial. The Quartz Granules provided by us is mostly used in the production of glass and its by-products. Quartz is the second most common mineral in the Earth's continental crust. It is made up of a lattice of silica (SiO_2) tetrahedral. Quartz has a hardness of 7 on the Mohs scale and a density of 2.65 g/cm^3.

Quartz Powder

We feel proud to introduce ourselves as one of the prominent company, engaged in offering superior quality Quartz Powder. The offered powder is used for fibre glass, glass floats, insulator, sanitary ware, refractory, paint, television picture tube, semi-conductors, etc.

Silica Quartz Sand

our firm specializes in trading, supplying, exporting & wholesaling deft free silica quartz sand. the chemical nomenclature of our offered sand is sio2 that is better known as silicon dioxide. this silica sand is precisely processed by crushing sand stone or quartz of open texture, and washing and grading it to yield requisite grain distribution. we offer this sand as per the in various quantity and packaging options at reasonable prices.

Our Product

Ramming Mass

Shri Vinayak Industries is a renowned company engaged in manufacturing, supplying and exporting a comprehensive range of excellent quality Ramming Mass. Offered ramming masses are widely used in the induction furnaces.

Natural Silica Sand

Silica Sand is quartz that over time, through the work of water and wind, has been broken down into tiny granules. Commercial Silica Sand is widely used as a proppant by companies involved in oil and natural gas recovery in conventional and unconventional resource plays. The resource is also used in industrial processing to make everyday items such as glass, construction materials, personal care products, electronics, and even renewable materials.

Quartz Silica Flour

We offer a wide range of Quartz Silica Flour which is processed using best grade natural silica, sourced in from reliable market vendors. The Quartz Powder range offered by us extensively used in electronics products such as computers, cell phones, televisions, radios and electronic games etc. These are available at cost effective price.

Our Product

Talc Powder

Business Type	:	Manufacturer, Exporter, Supplier
Packaging Details	:	Standard Packaging: 25kg & 50kg.

Dolomite Powder

With having years of industry experience, we are affianced in providing Dolomite Powder/Grit/Marble Chips to our esteemed patrons. Under our professionals' guidance, this dolomite is processed with the use of excellent quality chemicals by employing contemporary methods at our well-versed production unit.

Calcium Carbonate

Backed by years of experience of this industry, we provide our customers with the superior quality of Calcium Carbonate. Known for its compositional brightness and whiteness, the offered calcium carbonate is processed by using latest technology.

Our Product

Mica Powder

To meet the precise requirements of client, we are providing Mica Powder , wet ground mica and natural mica that is used in the diverse food industries such as paints, paper, rubber etc. We provide the offered powder to our clients after testing it against predefined quality parameters under the supervision of our skilled quality controllers.
