

RECYCLER-PRO COMPANY PROFILE

Auctus E-Recycling Solutions Pvt. Ltd.

About us :

Where everybody saw waste, we saw a potential - the potential of life. **Auctus E-Recycling Solutions Pvt. Ltd.** gives the obsolete electrical a new life and a new function of saving the earth. The company is a prominent Service Provider of Electronic Waste Recycling Services with certification of ISO 9001:2008, ISO 14001:2004 and OHSAS 18001:2007. The company undertakes Electronic Waste Recycling and Electrical Waste Recycling. It recycles electronic and electrical equipment that do not have resale value, either in their complete form or dismantled form. We refurbish them and sell them at reasonable prices to our clients. Therefore, by shedding a little sum of money, our clients get new electronic and electric appliances.

Auctus E-Recycling Solutions Pvt. Ltd. is a Noida (Uttar Pradesh) based company that was set up in the year 2011. **Mr. Imran Malik** is the Director of the company who is fuelled with long industrial experience of 10 years. Our foremost duty is to satisfy our clients completely. We perform the task of refurbishment of numerous items in the best manner and make them highly functional that is sure to satisfy our customers. We follow complete transparency in carrying out our business activities. Our policies are ethical and completely known by our clients. So, we are able to maintain cordial and close relations with them. As a result, we have become a preferred name in the domain. You also play an important part in the process, find out how.

Infrastructure Our workshop is well-maintained and fully equipped with all the requisite resources and facilities. We have all the modern tools and machines to refurbish various electronic and electrical wastes in the best possible way. We carry out recycling process safely. Also, we have a spacious warehouse. We go to great lengths to stop E-waste from reaching landfills, where it not only poses a threat to nature but also becomes a grave health hazard.

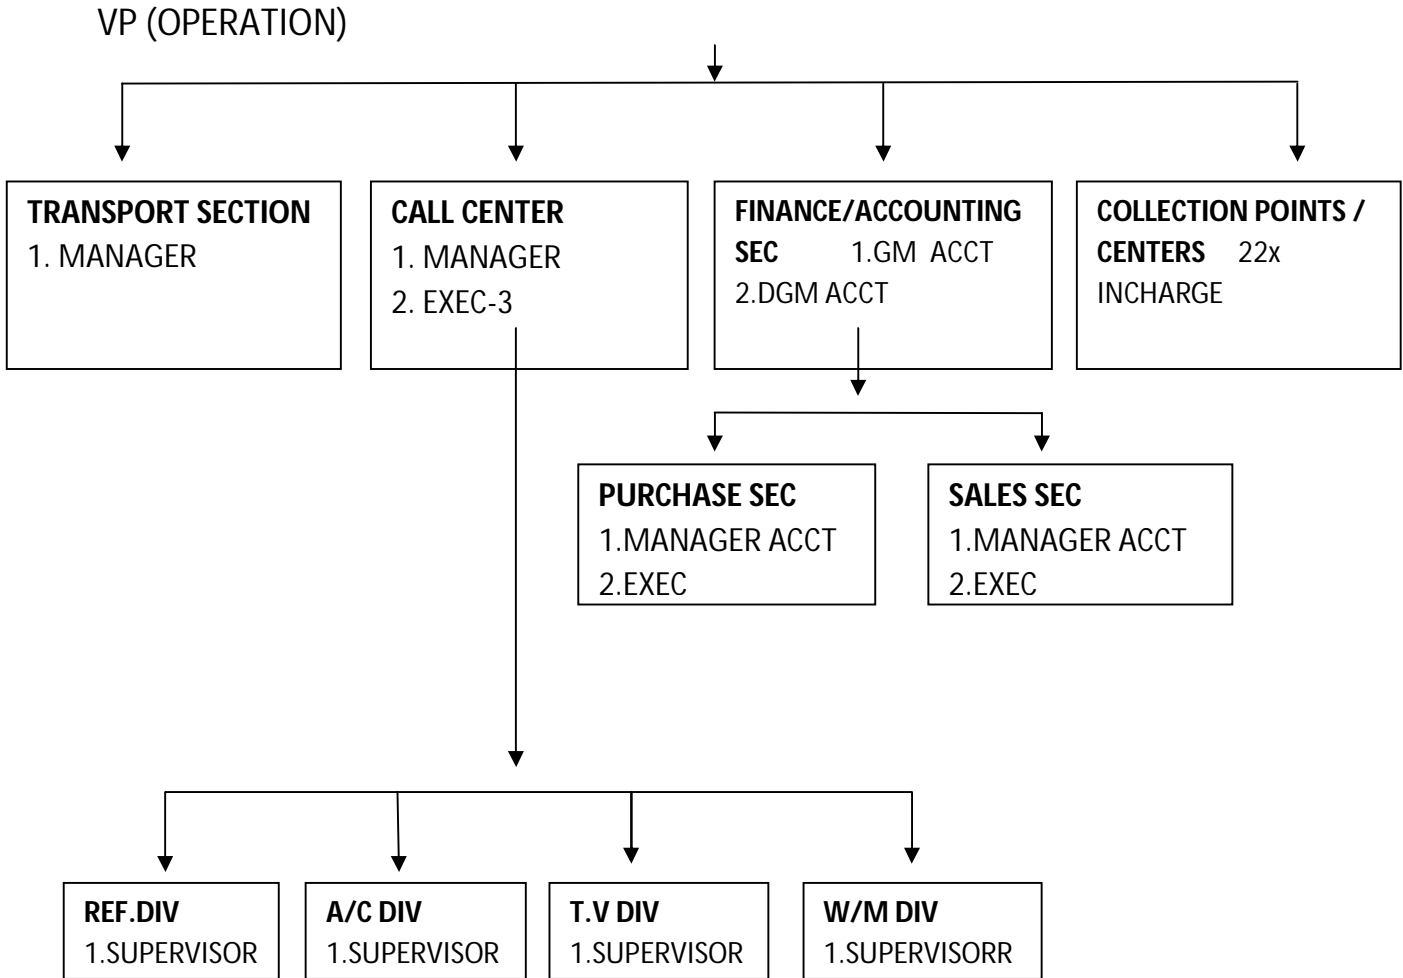

Team : Fully trained team is the heart of our company. It comprises of experts that are masters in recycling business. Our dedicated and knowledgeable team is our most valued asset. The technical assistance of our employees provides us great support for accomplishment of various business activities.

Process : The company's recycling process is a balance between disassembly, mechanical separation of complex materials and metallurgical treatment, resulting in a minimization of the labor intensive manual disassembly.

- **First Stage** : Manual segregation of components, where different parts of E-waste are separated.
- **Second Stage** : The mechanical separation process is applied. In this process, ferrous, aluminum, plastic and non-ferrous materials are initially separated.
- **Third Stage** : The plastics are then recycled by group's innovative plastics recycling process, which further processes the plastic.
