WHO ARE WE?

Trivikram Flowtech (TFT) is your one-stop destination for providing fluid solutions for a wide range of industries. Our areas of expertise include application engineering, R&D, selection of pumps and much more. Apart from this, we sell an extensive range of positive displacement and centrifugal pumps for usage in commercial markets.

Our pumps are synonymous to providing leading performance and high efficiency. What makes us stand out in the crowd is our knowledgeable and dedicated team of experts who have an experience of over 25 years. We have enjoyed exceptional growth across these years due to our loyal customer base, the standard of projects and thirst to enhance our skill set.

WHAT DO WE DO?

TFT is known for its user-centric approach and versatility in the competitive market. We strongly believe in revolutionising the marketplace by providing innovative and cutting-edge solutions to our clients. Our ultimate motto is to cater to the requirements of the clients with the best possible pumping solution.

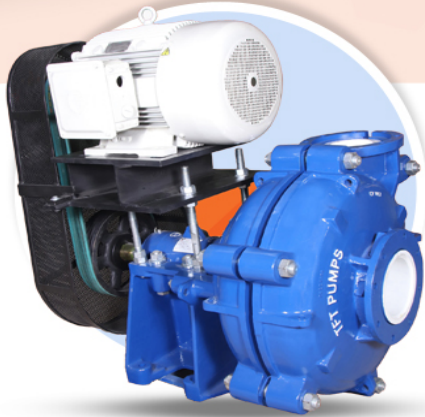

Our professionals are well versed with the latest technologies to meet your expectations with full commitment. At TFT, the pumps we provide meet increasing demands for energy-efficient systems to facilitate businesses to grow at an exponential rate. We have set firm footing in industries like chemical, paper, M-Sand & mining, oil & gas, agriculture with years of excellence.

HOW GOOD ARE WE?

We understand that each of our customers must install the correct pump and its accessories to boost production. With 20+ years of experience, we can confidently say that TFT is the place where expertise meets engineering. What makes us stand class apart is our willingness to upgrade and adapt to the changing needs of the industry.

Apart from that, we comply with appropriate safety regulations to ensure that you get the best product suiting your requirements and needs. From refinement to development to continuous testing, we take care of everything when it comes to choosing the right pump for the clients. Here is our multi-pronged approach which has helped us expand across the globe:
