ABOUT US

It takes us great pleasure in interacting with your goodselves on what we call 'welcoming to the Mango Treat'. So here's a welcome to you to the 'Mango Treat'.

India as you know, shares the honor and distinction of being the largest producer of the 'Alphonso Mango', in other words the supreme of all Mangoes. This golden fruit is blessed with a unique shape, irresistible taste and a feeling that people only call 'divine'.

In the Indian sub continent, the Alphonso is only cultivated on the western coastal ranges in India, popularly known as the 'Konkan Belt' also called the 'California' of India. In the heart of Konkan, lies Pawas, Ratnagiri, a town that boasts of natural organic soil and the sea breeze, making it the most ideal environment for mango production.

This is exactly where our mango orchids lie, spread over 500 acres across the length and breadth of this town. Desai Bandhu Ambewale, a name synonymous with Mango and Mango cultivation for over 10 decades now, we preserve this natural heritage and are growing it with every passing day. We are proud to tell that We are following Good Horticultural Practices. The special care and specialized attention to these orchids and mango trees under the roof of DESAI AGRO FARM made us the only successful exporter of Alphonso Mangoes from India to Japan. We have won the First prize for Alphonso Mango and many other prizes for different cultivar of mangoes in ALL INDIA MANGO SHOW for last many years.

The different products from this KING of Mangoes are produced by DESAI PRODUCTS. Bear the distinction of being the pioneers in Mango pulp, we are known for the quality that is offered. The best hand picked mangoes are carefully selected and are stored in an environment, congenial for perfect ripening of mangoes. Once ripe, they are washed hygienically and further graded. These meticulously sorted Alphonso Mangoes are then ready for processing to make pulp. At Desai Products, a fully equipped infrastructure welcomes you that has in place the state-of-the art machine processes that boast huge production quantities, while retain our trademark quality and the final word in taste. The state of the art production unit with about 50000 sq ft area made us easy for handling, manufacturing high class products from different fruits like Kokam, Jackfruit, and of course Mango.

Desai Products is certified by ISO 22000 and ISO 9001. Desai Products markets its produce under the popular brand name 'AMAR' Alphonso Mango. Among the other products the main product is Alphonos Mango Tidbites with Alphonso Mango pulp. This new product is appreciated by the customers from USA, Singapore, Australia, Canada, New-Zealand , Ukrain and Japan.

The unique product Alphonos Mango Tidbites with Alphonso Mango pulp gives mouth feel effect of eating natural, real, naturally ripped Alphonso Mango. The state of art process is developed by us to manufacture this product. The convention pulp gives feel of plain pulp but this indigenous pulp gives feel of Lumps/tidbids in pulp, ultimately blast of Natural Alphonso Mango Flavor in Mouth.
