About Us

FARMADIL INDIA LLP is a leading manufacturer, Exporter and supplier of quality organic fertilizers, bio-fertilizers, Bio-stimulant and Raw Material such as Bentonite Granule, Roasted Bentonite and Dolomite Granule.

With Our more than 12 Years of Experience and strong focus on quality manufacturing as per Standards of FCO,1985(Fertilizer (control) Order,1985 Specifications), innovation, and Customer/farmer satisfaction, we have established ourselves as a trusted name in the industry.

At FARMADIL INDIA LLP, we believe in the power of organic farming and its positive impact on the health of our planet and future generations. Our products are carefully formulated using natural and eco-friendly ingredients, ensuring that farmers can achieve optimal yields while minimizing their reliance on synthetic chemicals.

Our manufacturing unit, located in Bhavnagar. We employ innovative production techniques to create organic granule fertilizers that are not only effective in enhancing crop productivity but also eco-friendly and sustainable. Additionally, our bio-fertilizers and bio-stimulants offer natural solutions to improve soil health, plant growth, and overall agricultural sustainability.

In addition to our core manufacturing operations, we also provide job work services, catering to specific requirements and customizations based on the needs of our customers, wholesalers, and third parties. We take pride in offering tailored solutions to meet diverse demands and specifications.

At FARMADIL INDIA LLP, we recognize the importance of strong business relationships to foster growth and expand our reach. We have established fruitful partnerships with marketing firms in key regions such as Rajasthan, Chhattisgarh, Uttar Pradesh, Madhya Pradesh, and Haryana. These collaborations enable us to efficiently distribute our products, reach a wider customer base, and meet the specific demands of each region.

Our focus on farmer satisfaction drives us to consistently deliver superior products and services. We believe in understanding and addressing the unique requirements of our customers, ensuring that our solutions align with their goals and aspirations. Our dedicated customer support team is always available to provide assistance, answer queries, and guide customers in making informed decisions.

As we move forward, we are committed to continuous improvement and expansion. We invest in research and development to stay abreast of the latest advancements in the industry and offer cutting-edge solutions to our customers. We also actively explore new markets and opportunities to expand our business footprint while maintaining our unwavering commitment to quality and sustainability.

Choose FARMADIL INDIA LLP as your trusted partner our tagline, "Deal Karo, Dil se," encapsulates the spirit of our company. It signifies our commitment to building long-lasting relationships based on trust, where we believe in making deals with our heart. Our company is dedicated to providing high-quality products and services to our customers. Whether you are a new customer or a returning one, we are dedicated to providing you with the best possible service. Experience the difference of our superior products, personalized services, and unwavering dedication to supporting sustainable agriculture practices. Together, let us cultivate a greener and more prosperous future for the agricultural sector.

Products

FARMA GROW PROM

Phosphate Rich Organic Manure (Prom)

FARMA-GROW PROM- Phosphate rich organic manure is a type of fertilizer used as an alternative to Diammonium phosphate and single super phosphate. FARMA-GROW PROM is produced by co-composting of high grade rock phosphate Bentonite Mineral with organic Carbon and other manure it provides Phosphorous to the crops during Development Stage of the crops.

- > Colour Options : Red Brown, Black
- > Size : 3 to 4 mm round shape granule

Ummid Plus

Organic Manure

Ummid Plus Organic Manure contains nitrogen (N), phosphorus (P), and potassium (K). Additionally, the organic manure contains 14% organic carbon and other multi micro nutrients. The organic matter in the manure encourages the growth of beneficial microorganisms in the soil. These microbes play a crucial role in nutrient cycling, disease suppression, and overall soil health.

- > Colour Options : Red Brown, Black
- > Size : 3 to 4 mm round shape granule

Ummid

Fermented Organic Manure

Fermented Organic Manure, also known as fermented organic fertilizer, is a type of organic fertilizer that has undergone a fermentation process to enhance its nutrient content and improve its effectiveness in providing primary nutrients N,P,K to the plants.

- > Colour Options : Red Brown, Black
- > Size : 3 to 4 mm round shape granule

Ummid Deluxe Gold

Organic Manure

Ummid Plus Deluxe Gold Granules is a high-quality organic manure product designed to enhance the growth and yield of vegetables and fruits. The granules are carefully formulated to contain essential nutrients such as organic nitrogen (N), phosphorus (P), and potassium (K), along with various other beneficial minerals vital for plant growth.

- > Colour Options : Red Brown, Black
- > Size : 2 to 3 mm round shape granule

FARMADIL POTASH

Natural Potash

Farmadil Potash is a type of organic fertilizer that provides a natural and sustainable source of potassium for plants. Potassium, also known as potash, is an essential nutrient required for various plant functions, including enzyme activation, osmoregulation, and photosynthesis.

- > Colour Options : Red Brown
- > Size : 3 to 4 mm round shape granule

Products

FARMAGROW

HUMIC SHINY BALL

FARMA-GROW SHINY BALLS is very good for soil application for germination of seeds and plant growth stimulator. Clear improvement in white root development, vegetative growth, flower induction, fruit set seeds and fruit induction. FARMA-GROW Shiny Balls are manufactured as per customers requirement which may contain Humic Acid, Amino Acid and other Growth enhancers.

- > Colour Options : Shiny Black, Shiny Blue, Shiny Green, Golden, Silver
- > Size : 3-4 mm round shape granule

FARMAGROW HUMIC Gold

Zyme

FARMA GROW HUMIC GOLD ZYME granules contain a blend of plant growth-stimulating substances, such as humic acid, amino acids, fulvic acid, and seaweed extracts which release nutrients slowly into the soil, providing a steady and prolonged supply of essential elements to plants.

- > Colour Options : Zed Black
- > Size : Mesh Size 10*20 , 12*25, 16*35

FARMA GROW FORCE

Bio-stimulant Granule

FARMA GROW FORCE promotes root development, leading to better nutrient and water absorption, as well as increased resistance to environmental stresses. it can lead to improved crop yield, quality, and uniformity. Using bio-stimulants can potentially reduce the reliance on synthetic fertilizers and pesticides, promoting more sustainable agricultural practices.

- > Colour Options : Red Brown, Black , Off-white
- > Size : 3 to 4 mm round shape granule

HUMIC GOLD ZYME PLUS

ZYME

HUMIC GOLD ZYME PLUS provides ability to promote hormonal activity in plants. It helps in flowering as it promotes additional buds when applied as the plants are beginning to bud. it improves soil fertility and soil microbial activity. It promotes plant nutrient uptake.

- > Colour Options : Zed Black
- > Size : Mesh Size 10*20 , 12*25, 16*35

FARMA BACTER BIO NPK

Carrier based Consortia

BIO NPK consortia Granules typically consist of a mix of different beneficial microorganisms, including nitrogen-fixing bacteria, phosphate solubilizing bacteria, plant growth-promoting (PGPR), and mycorrhizal fungi. Each strain contributes to specific functions that benefit plant growth and soil health.

- > Colour Options : Black , Off-white
- > Size : 3 to 4 mm round shape granule

Products

MYCO SHIELD

Mycorrhiza Bio Fertilizer

Mycorrhiza Biofertilizer is a natural and eco-friendly soil amendment that contains beneficial mycorrhizal fungi. These fungi form symbiotic associations with the roots of plants, creating a mutualistic relationship that benefits both the fungi and the host plant.

- > Colour Options : Zed Black
- > Size : Mesh Size 12*25, 16*35

Roasted Bentonite Granule

Roasted Bentonite can absorb and retain large amounts of water, which can be beneficial in agriculture, particularly in arid or dry regions. It helps to improve soil water retention and reduces the frequency of irrigation required for crops.

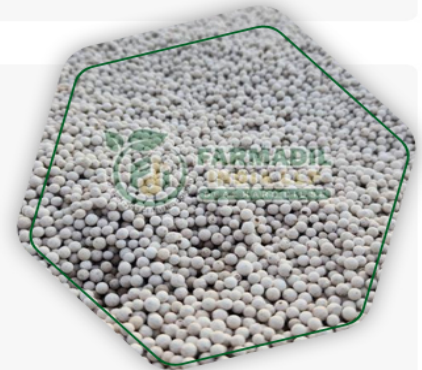

- > Colour Options : Zed Black
- > Size : Mesh Size 10*20, 12*25, 16*35

Dolomite Granules

Dolomite granules are a type of agricultural fertilizer made from the mineral dolomite, which is a naturally occurring double carbonate of calcium and magnesium. These granules are commonly used to provide essential nutrients to plants and improve soil fertility.

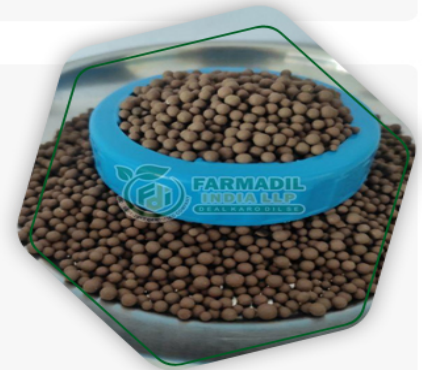

- > Colour Options : Natural off white
- > Size : 3-4 mm round shape

Raw Bentonite Granule

Bentonite granules are a form of granulated bentonite clay, which is a type of absorbent and highly expandable clay derived from volcanic ash. Bentonite can be used as a soil conditioner which improves fertility and pH of soil. It acts as a binding material hence, can be used as a carrier of nutrients because of its slow release properties.

- > Colour Options : Natural Brown
- > Size : 3-4 mm round shape

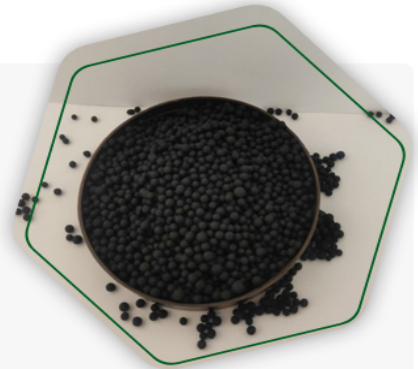

Products

Black Bentonite Granule

Raw Bentonite granules coated with organic carbon offer additional benefits compared to regular Bentonite granules. The organic carbon coating enhances the properties of Bentonite, making it even more effective for various applications.

- > Colour Options : Black
- > Size : 3-4 mm round shape

Potassium Humate Shiny Flakes

Humic Acid

IMPORTED (MADE IN CHINA)

Humic acid is the primary component of Potassium Humate Shiny Flakes. It is a complex organic compound that plays a crucial role in improving soil structure, nutrient retention, and water-holding capacity.

- > Colour Options : Shiny Black
- > Type : Flakes, powder

AMINO ACID POWDER

IMPORTED (MADE IN CHINA)

Amino acid powder is a supplement derived from natural sources, containing a mixture of various amino acids. The powder form makes it easy to mix with water and apply to plants or soil in farming.

- > Colour Options : Light Yellow
- > Type : Powder

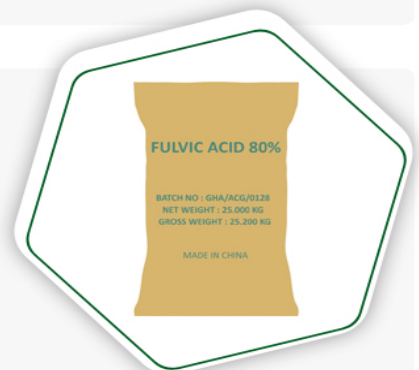

Fulvic Acid

IMPORTED (MADE IN CHINA)

Fulvic acid powder is a type of organic derived from decomposed organic matter such as plant and animal residues. Fulvic acid helps to chelate or bind essential nutrients in the soil, making them more readily available for plant uptake. It enhances the absorption of minerals like calcium, magnesium, zinc, iron, and copper by plant roots.

- > Colour Options : Golden Yellow or Brown Dark Chocolate
- > Type : Powder

Products

Seaweed Extract

IMPORTED (MADE IN CHINA)

Seaweed extract acts as a biostimulant, promoting various physiological processes in plants, leading to overall improved plant health and performance. Seaweed extract powder can be used in conjunction with other fertilizers, enhancing their effectiveness and promoting better nutrient utilization.

- > Colour Options : Black
- > Type : Powder

FARMA GROW

FERMENTED ORGANIC MANURE LIQUID

Fermented organic manure liquid, is a nutrient-rich liquid derived from the fermentation of organic materials such as compost, manure, plant residues, and other natural substances.

- > Colour Options : Light Brown
- > Type : Liquid

FARMA GROW ROOT KING

Plant Growth Stimulant

FARMA GROW Root King- A plant growth stimulant liquid is a substance that is applied to plants to enhance their growth, development, and overall health. These stimulants are typically formulated to provide essential nutrients, hormones, or other compounds that promote plant growth and productivity.

- > Colour Options : Black
- > Type : Liquid

FARMA GROW HUMINO

HUMIC + AMINO Liquid

This innovative plant growth stimulant is a synergistic blend of humic acids and essential amino acids, designed to maximize the potential of your plants. This leads to healthier roots and stronger growth.

- > Colour Options : Brown
- > Type : Liquid
