In 1991, Mario Industries was set up in Mumbai, Maharashtra, by an entrepreneur in the country's quickly expanding sector. We are a reputable producer and seller of a variety of glue sticks and glue guns. To meet the demands of the modern era, the whole range of products is produced and designed using cutting-edge advanced technologies and standard components. We work with a range of clients, including small and major businesses.

◆ Client Satisfaction

Since our company's foundation, we have maintained our products at a high standard to meet and surpass customer expectations. High customer satisfaction and a resoundingly positive market response are the outcomes. Additionally, the approved quality assessments check the items' satisfactory performance to reassure our customers.

◆ Our Vision

Our goal is to join the glue stick industry as a full participant. We will work to make the most of our strengths in product and design innovation, customised offers, and broadening product variety. Our beloved objective—pursuing current production technology—will win us the trust of our clients.

◆ Why Us?

The enormous number of delighted customers demonstrates the high calibre of the products we offer. We are fortunate to have a terrific team that is made up of both young and seasoned professionals, which helps us achieve our goal of being a well-known company that offers clients high-quality, reasonably priced items.
