ABOUT US

Relemac Technologies Private Limited is an amalgamation of professionals from diversified fields ranging from Technical to Finance and Marketing. Established in the year 1993 as a Proprietorship concern by an enterprising young entrepreneur, Relemac has risen through thick and thin to become one of most renowned brands today. Initially Relemac started as a single product company but gradually it researched and developed new products and increased its inventory to cover all type of cables.

The strength of the company is its utmost dedication towards its customers and its sincerity towards the product specification and quality. It is no wonder that Relemac today holds various licenses of Bureau of Indian Standards and its Quality System has been accredited by ISO-9001-2008. Further, being a socially responsible company, Relemac embarked on a mission to protect the environment around its premises and has been rewarded by the grant of ISO: 14001 certifications for its efforts.

Our efforts towards quality and customer satisfaction has reaped good rewards for us in the shape of approvals with most of the major Utility providers, EPC Contractors, Project Consultants and many prestigious large scale private users.

Not one to sit on our laurels continuous upgradation of machines, methods and manpower is of prime importance to us. It is ensured that the company's infrastructure is up to date in all respect and our manpower whom we consider an integral part of our assets are always abreast with the latest technological advancement in our field. We have a well experienced and technically competent work force which is highly motivated. Each work day in our company is measured in terms of betterment achieved and improvements made. Good or better are words we don't believe in, for us there is only one word which we always strive for and that is BEST.

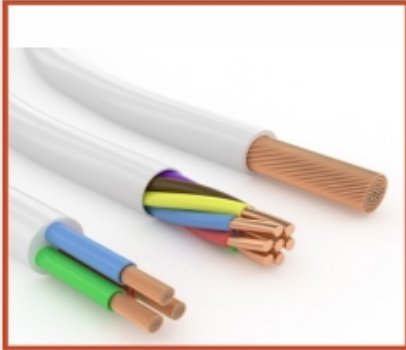

Our motto: "Do things corrects the first time and always"

Cables

Relemac Technologies Private Limited provides integrated cabling solutions for varied applications ranging from domestic wiring to complex industrial automation requirements. Our portfolio of products comprises of cables for domestic, industrial, distribution, communication, instrumentation and solar applications.

Submersible Cables

We are one of the most sought-after Submersible Cable Manufacturers. The PVC Insulated & Sheathed 3 core flat submersible cables that we deal in are ideal for usage in submersible pumps in deep wells for irrigation (Direct Burial), drinking water supply, industries, mines, fountains. Our company is the manufacturer of a wide range of Submersible Flat Cables that are designed as per ISI 694:2010. The Submersible 3 Core Flat / Round Cables are amongst our best products offered to the clients.

Lan Cables

We are one of the well-reckoned LAN Cable Manufacturers and Supplier in India. The assorted range of LAN Cables, Signalling Cables, Structural Cables, etc. that we provide is designed by the experienced professionals having vast industry experience. These Data Cables are cables that lead from your computer to your GPS device. These Cables tend to use the newer USB or the older serial protocol.

www.relemaccables.com

Coaxial Cables

Relemac Technologies Pvt. Ltd. is one of the leading Coaxial Cable Manufacturers from India. Our wide range of Cables and Wires including Digital coaxial cable, Industrial Braided Cables, Fiber Optic Cable, Twisted Pair Cables, Twin Satellite Wire, etc. is designed in compliance with the industry defined norms of quality.

PTFE cables

Relemac Technologies has well-established itself over the last 20 years. We deal in a wide range of PTFE Cables that find application in several commercial as well as residential set ups. We opened in 1993 and we are now known worldwide as a provider of the highest quality cables as well as for our design and manufacturing ethos. We are one of the largest manufacturers of many different types of wiring and cabling, and that includes our entire PTFE wire line right from PTFE Cables, PTFE Wires, Multi Core Cables and to High Temperature Power Cables. Below you will see the sub categories.

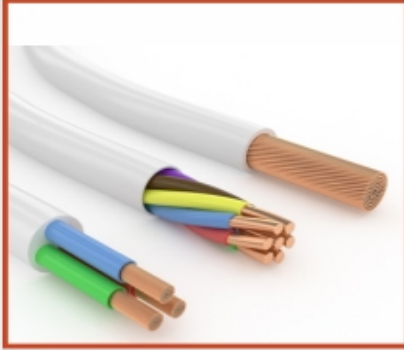

XLPE Cables

We are one of the prominent XLPE Cables Manufacturers in India. as per IS:7098:Pt-1:1988. Our sole Objective is to provide the best XLPE Cable, Cross linked polyethene insulated cables, Insulated Armoured Power Cables, XLPE SWA PVC Cables, Underground High Voltage Cable, Industrial XLPE unarmored Cables, Electrical Specification Wires, etc. to the buyers. What's more, all our Cables are economically priced too. As a result, we have garnered repute amid the prominent XLPE Cables Suppliers in India.

www.relemaccables.com

PVC Flexible Cables

We are positioned amongst the prominent PVC Wires Manufacturers in India. As per IS: 694:2010. The PVC Cables as well as PVC Insulated Cables that we provide are designed and manufactured by the experts. All our PVC Cables conform to the requisite norms of the industry. Furthermore, PVC Insulated Cables are manufactured with Aluminum and Copper conductors conforming to Indian Standards and to International Standards like BS, IEC, etc.

Aerial Bunched Cables

We are one of the promising Aerial Bunched Cables Manufacturers. The Aerial Bunched Cables (ABC) as per IS: 14255:1995 that we deal in are required for electrical transmission system or a telecommunication line, which is suspended between utility poles or electricity pylons. Aerial Bunched Cables provide safety and reliability compared to other cables. We provide only the best and thus have created a reputation amid the prominent Aerial Bunched Cables Suppliers in India.

Control Cable

We are counted among the leading Control Cables Manufacturers in India. as per IS:1554 : Pt-1: 1988. The Control Cables that we deal in differ from Power Cables in their application. Control Cables are used to carry signals of low power strength, but can be subjected to severe working temperature conditions like heaters, boilers and can be exposed to oil, chemicals and other solvents.

www.relemaccables.com

Instrument Cables

Relemac Technologies is a world leader in both designing and manufacturing of High-Bandwidth Cables and Screened Instrumentation Cables for as per BS:5308P-2 / BS:5308:P-1 / IEC:189 / VDE:0815 telecommunications and other industries. Relemac is one of the world's largest Instrumentation Cable Manufacturers and makes available Instrumentation Signal Cables, Solar Cable, PTFE Cables, Overall Screen Cables, Computer Cable

Telecommunication Cables

Relemac Technologies Pvt. Ltd is the name to reckon with if you are looking for high performance Telecom Telephone Cable in India. The wide range of Telecommunication Cables that we deal in comprises PCM cable, Telephone Cable, Information Wires, etc. We are well-known Manufacturer of Telecom Cabling & Telecommunication Cables from India and make available the cables in different types. As per DOT Specification DOT (GWIR 06/02) / C-DOT/ VDE: 0815, 0816 / IEC: 189 / IS: 5608, TEC Specification: GIR/WIR - 06/03 March 02

Fiber Optical Cables

RTPL is a well-known Fiber Optical Cables Exporter in India. Besides, counted amid the leading Single & Multimode Armored Fiber Optical Cables Manufacturers, it also offers Patch Optical Fiber Cables in India. Buyers can purchase Single Mode Optical Fiber Cable and Multimode Optical Fiber Cable in different standardized as well as customized specifications from the company.

www.relemaccables.com

Fire Survival / Resistant Cables

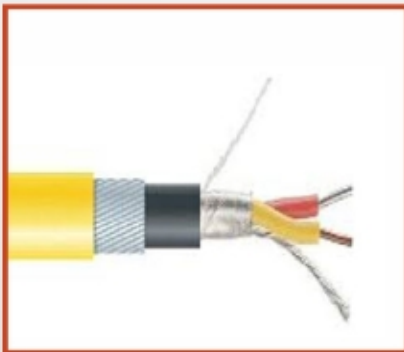

Relemac has added a special range of Fire Survival & Fire Resistant cables to its product range. The Fire Survival Cables that we provide are designed to continue to operate for a defined minimum period of time in case of fire including water spray & mechanical shock. The range of our Fire Resistant Cables is tested in NABL accredited labs Like ERDA Baroda, which is considered as the highest degree of recognition for being a competent laboratory in India, thus ensuring products of high quality.

Rubber Cables

We are counted amid the well-known Rubber Cables Manufacturers in India. In keeping with the company's commitment to technological advancement, elastomer materials such as Polychloroprene (PCP), Chloro-Sulphonated Polyethelene (CSP), Nitrile Rubber /PVC blends, Ethylene Propylene Rubber (EPR), Ethylene Vinyl Acetate (EVA) and Silicone have been specially compounded to meet numerous heat oil and fire resisting requirements. In the recent years, Relemac Technologies has also developed special Rubber Cables & Elastomeric Fire Survival Cables for power, control and instrumentation wiring.

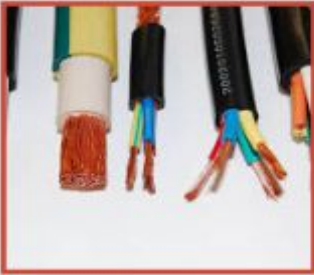

Thermocouple Cables

Thermocouple Cables are the same as Instrumentation Cables. They both are used for process temperature measurement. The manufacturing process of these cables is similar to Relemac's paired instrumentation cable with the difference being in the conductor material. Thermocouple Cables are used in a wide variety of processes to sense temperature. Thermocouple Cables are used to connect control surfaces to the pyrometers, enabling accurate temperature indication and control.
