# ABOUT US

Native Paper Products is an Company, as-  
sessed for Design, Development and  
Manufacture of Paper Cores a testimony to  
the quality assurance and product perfor-  
mance. We are one of the renowned manu-  
facturers and exporters of paper cone from  
India. We manufacture paper cone in plain  
and printed varieties, depending upon the  
specific requirement of our customers.

With world class manufacturing facilities,  
Native Paper Products offers Paper Cores of  
international standards in a wide range of  
sizes and types. The Paper Cores manufac-  
tured by NAtive Paper Product have set in-  
dustry standards and have earned the trust  
and confidence of a large number of  
Customers.

Native Paper Product believes in working as  
partners with their customers to provide  
products that both can be proud of, meeting  
specific requirements that reflect a good  
value investment demonstrated by profit-  
able operating results. Paper tubes are  
manufactured from recycled paper and can  
be used over again, making them a cost-  
efficient alternative to metal, plastic, glass  
and wood.

Paper tubes are comparably quite cost-  
effective because they are easier for manu-  
facturers to cut, purchase and dispose of  
than most other materials. Most commonly  
used for transporting papers, posters and  
other roll-able items, shipping tubes and  
mailing tubes are widely used by large com-  
panies and individuals alike. All products are  
manufactured under strict quality control to  
ensure dimensional accuracy, strength and  
consistency in quality.

## ● Mission

Our Mission is to satisfy respected clients  
from all over the country involve in apparel &  
baggage business with perfect accessories  
solution and maintaining on time delivery.

## ● Vision

To create a niche in the industry in providing  
total printing & packaging solution by deliv-  
ering quality products to our customers on  
time by consistently meeting and exceeding  
customer expectations.

## ● Quality Assurance

From the initial design stage through to the  
final delivery utmost care is taken to manu-  
facture quality product. At early stage from  
the analysis of raw material, in-house and  
post-process inspection, our commitment to  
rigid environmental and quality standards is  
unfailing.
