Established in the year 2019, HOF Pharmaceuticals Limited has established itself as a major pharmaceutical medicines supplier and exporter in Ahmedabad (Gujarat). The company is headed by Mr. Darshan Dhanani (the company's COO) who has years of experience in marketing. It is his comprehensive knowledge of this industry that plays a vital role in making the company into one of the most sought-after pharmaceutical medicines suppliers in the country. We supply our medicines to various parts of India and other countries.

**Vendor Base:**

One of the important factors that contribute greatly to our success as a pharmaceutical medicines supplier and exporter is our association with various reputed and trusted manufacturers/vendors in the market. The manufacturers formulate each of the tablets and capsules carefully by using authentic and active ingredients and salts. These vendors ensure that the medicines that we procure from them go through several testing in modern laboratories and are safe for consumption.

**Quality Assurance:**

Quality is the foremost thing that is mostly considered by the buyers when they buy pharmaceutical medicines. We ensure that our offered medicines are highly effective in targeting a particular health condition. The medicines are produced under controlled conditions by the most experienced and expert pharmacists who keep the composition accurate as required.

**Warehousing:**

As pharmaceutical medicines require the most suitable conditions of light and temperature, we have invested considerably in our warehouse facility to make it suitable for medicine storage. We maintain the light and temperature of our warehouse on regular basis in order to avoid moisture and other contaminating factors.
