QUICKBIRD

REFRIGERATION AND A.C. WORKS

Quickbird Refrigeration And A.C. Works is constantly endeavouring for excellence in product quality and client's satisfaction since its inception in the year 1990. The logical thoughts and effective techniques of M. A. Muqtadar Khan, the CEO & Director of the company, has helped us in achieving huge success in business operations. With the concern to launch the firm as a prominent one from others, we have gained distinguished position amongst the reliable Manufacturers, Exporters & Suppliers of Water Cooler, Water Purifier System, Water Chilling System, Water Cooling System, RO and UV Purifier System, etc.

Being an ISO 9001: 2008 Certified Company based in Hyderabad from Andhra Pradesh, we have also earned loads of awards in the market for our excellent features of products and services offered by us. So far, we have developed newly designed water heating cum cooling system which can save power up to 80%. Thus, the company has achieved new heights of success in terms of quality and constantly serving large number of clients based in India, Africa, Arab and Asian Developing Countries.

Water Chilling System • Domestic RO System • Water Heating System

High-tech And Precise Water Heating And Cooling System

WATER HEATING SYSTEM

Water Heating Systems offered by Quickbird Refrigeration And A.C. Works are available in different types that comprise of Swimming Pool Heat Pump, Centralized Water Heating System and Industrial Water Heating System. These Water Heating Systems are precisely made as per the requirement of various industries. In fact, these are manufactured by using advanced machines and latest technology. Moreover, these are power saving equipments and are accessible in compact designs. As such, due to its eco-friendly nature, it is highly preferred by large number of clients from India, Arab, Africa and Asian Developing Countries. Such popularity and recognition in the marketplace has enlisted us as one of the reliable Water Heater Manufacturers, Exporters and Suppliers from Hyderabad, Andhra Pradesh.

Swimming Pool Heat Pump

Swimming Pool Heating Pump is exceedingly effective and is exclusively manufactured for pool heating. It is standardized in operation and gains heat contained in the ambient air. Quickbird Refrigeration And A.C. Works is a flourishing name in the field of manufacturing and exporting high quality heat pump that is the most energy efficient technique of swimming pool heating and will considerably abridge your pool running costs. They assist in holding a comfy soothing temperature all year round and help in increasing the utilization of your pool. Our manufactured swimming pool heating system can save up to 80% of the operation cost and this is the reason of being one of the magnificent Manufacturers, Exporters and Suppliers from Andhra Pradesh, India.

Features :

- Bright design
- Easy installation and replacement
- Advanced electronic controlling
- Economical and high-efficiency
- Multi-functional optional parts
- Smart computer control and
- LCD display controller build
- Eco-friendly gas
- Power Saving
- Long operating life
- Lower noise level

Applications:

- Swimming pools
- Spas
- Crocodile farms
- Fish farms

Centralized Water Heating System

Quickbird Refrigeration And A.C. Works is presenting an exclusive array of Centralized Water Heating System that is offered by us with the best packaging solutions. The company is well settled with large manufacturing unit that is occupied with advanced machinery. Being a reputed Central Water Heater Manufacturer, we offer our products with quality features like, rust resistance, robust construct, power saving, etc. These are precision fabricated body that offer high functionality and service life standards, owing to which, we are accredited as one of the reputed Manufacturers, Exporters and Suppliers of Central Water Heater from Hyderabad, India.

Features :

- Compact design
- Power saving
- Easy to install
- Accurate dimension
- Corrosion resistance
- Competitive prices

Applications :

- Solar hot water supply
- Swimming pool heating
- House heating

WATER HEATING SYSTEM

Industrial Water Heating System

The Industrial Water Heating System offered by Quickbird Refrigeration And A.C. Works is not only long long-lived but also provides incomparable performance, which creates more unique and demanding in the global market. Our company is one of the reputed Manufacturers, Exporters and Suppliers of Industrial Water Heater from Andhra Pradesh (India). Till now, we have also developed an innovative Water Heating Cum Cooling System that can easily save power up to 80%. Our quality array of products can absorb the heat from atmospheric air and then lastly it is being transferred into water. The electricity is used just to run the system and not to directly heat water. It also helps in saving customers nearly 75% to 80% of power. Further, these are available in compact designs and are also eco friendly in functioning, thus reducing possibility of global warming.

Features :

- Durable
- 75% to 80% power saving
- Eco-friendly
- Compact designs
- High efficiency

Applications:

- Hostels
- Hotels and Resorts
- Apartments
- Chemicals and Fertilizer Industry
- Pharmaceutical Industry
- Breweries
- Electroplating
- Automobile Industry
- Canteens
- Hospitals
- Dairies
- Textile Industry
- and Galvanising Industry
- Boiler Feed

WATER COOLING SYSTEM

Quickbird Refrigeration And A.C. Works is introducing immense range of Water Cooling System that comprises Stainless Steel Water Cooler and Industrial Water Cooler. All these cooling systems are used for offering de-mineralized cool water all along with perfect flow rates and pressures to the furnace and its off-line equipment. These are strictly checked on several parameters before delivery and are fabricated with the help of advanced machinery that certifies its long functioning life and durability. These are highly effective in saving energy and low maintenance costs.

Our large varieties of Water Cooler System are carefully packed by using high quality packaging materials, in order to deliver our products in a safe way. As such, these qualities have made us stand amidst the reliable Water Tank Cooler Manufacturers, Exporters and Suppliers from India. Today, we have expanded our networking areas, so as to fulfill the demands of large number of clients based in India, Africa, Arab and Asian Developing Countries.

Stainless Steel Water Cooler

Stainless Steel Water Cooler offered by Quickbird Refrigeration And A.C. Works, are widely used for households, public places, corporate houses and several other areas. We are engaged in manufacturing high grade Water Cooler Dispenser that is free from any sort of leakage and can be easily cleaned when needed. Our SS Water Cooler is fitted out with purifiers and is available in different capacities, so as to suit the requirements of different clients. These are mostly apprehended by our patrons because of its uncompromising construction, high performance and easy operation. We use best quality stainless steel sheet while fabricating these coolers. Thus, these extensive features have acclaimed us as one of the reckoned Water Cooler Dispenser Manufacturers, Exporters and Suppliers from India.

Features :

- High reliability
- Better functioning
- Easy installation
- User friendliness

Applications

- Schools
- Colleges
- Hospitals
- Restaurants and several other areas

Components

- 202 Grade stainless steel (0.8mm thick outer body)
- 304 Grade stainless steel (inner tank)
- Kirloskar (Emersion) / Tecumseh Compressors with 1 (one) year warranty
- Annual Maintenance Contracts (AMCs) after the completion of one year warranty
- Customer friendly designs

Industrial Water Cooler

Industrial Water Cooler is generally used in various industrial areas like Educational Institutions, Offices, Pharmaceuticals, Corporate houses, etc. These are made up of stainless steel materials and are strictly checked on varied parameters that ensures the reliability of water coolers. Nurtured with rich industrial experience and cognition, Quickbird Refrigeration And A.C. Works is enlisted amidst the trustworthy Industrial Water Cooling System Exporters, Manufacturers and Suppliers from India. Our unmatched water coolers are high in demand and are mostly appreciated due to its high efficiency and low maintenance cost. Our entire range of industrial equipments is packed by using high grade raw materials and is delivered within a limited time frame without any damages.

Features :

- Light weight
- Perfect finishing
- Precisely designed
- Covered top
- Eco-friendly
- Competitive prices
- 202 Grade stainless steel (0.8mm thick outer body)
- 304 Grade stainless steel (inner tank)
- Kirloskar (Emersion) / Tecumseh Compressors with 1 year warranty
- Annual Maintenance Contracts (AMCs) after the completion of one year warranty
- Customer friendly designs

Applications :

- Educational Institutions
- Offices
- Pharmaceuticals
- Corporate houses
- Homes and several other areas

QUICKBIRD

REFRIGERATION AND A.C. WORKS

WATER CHILLING SYSTEM

Quickbird Refrigeration And A.C. Works is specialized in manufacturing Water Chilling System that is offered by us in different ranges like Industrial Water Chiller, Instant Water Chiller and Centralized Water Cooling System. These are power saving systems that are used for providing chilled water in several areas. The system is fully equipped with special features and is available in different capacities. These are well-designed to meet the global standards and are verified on various operational methods. Many industries use these Water Chillers for their production procedure and are highly apprehended for its high performance, modern and functional design as well. In order to meet the requirements of various industries, we make high capacity chiller that are easily used in various Laboratories and Industrial applications. Owing to such enhancement in our product range, we are counted amongst the reliable Manufacturers, Exporters and Suppliers of Water Chiller System from India. Our large array of chilling systems is supplied to various countries including India like Africa, Arab and Asian Developing Countries.

Industrial Water Chiller

Industrial Water Chiller manufactured by our experts at Quickbird Refrigeration And A.C. Works are commercial because they require low maintenance and can easily be installed in different areas. We deal in providing Industrial Water Chillers that are available in different capacities and are easily availed by us at the cost-effective prices. So far, our company is highly accredited for its excellence and high efficiency. These are industrial water refrigeration system that can easily supply cold water into the industrial process equipment. In fact, these are non-corrosive and are easily installed. Therefore, fulfilling each and every needs of clients have carved a niche in the marketplace due to which, we are popular as one of the pre-eminent Manufacturers, Exporters and Suppliers of Industrial Water Chiller System from India.

Features :

- High quality
- Long lasting
- Reliable performance
- Long lasting
- Withstand adverse conditions
- Efficient performance
- Robust construction

Applications

- Controlled cooling of products, mechanisms and factory machinery in a wide range of industries
- Plastic Industry
- Pharmaceutical formulation
- Food and beverage processing
- Paper and cement processing
- Various other applications

Instant Water Chiller

Quickbird Refrigeration And A.C. Works is introducing newly designed Instant Water Chiller that is used for chilling purposes. These are generally used in various industries like water plants, soft drink plants, food, cement, pharmaceutical, etc. Being an experienced Water Chilling System Supplier, we fabricate these products by using high grade raw materials that consists of stainless steel storage tanks and refrigeration system as well. Moreover, these chillers are made as per advanced technology and instantly offer cool water. Such immediate cooling ability creates this product ultimate to be used in gymnasiums, clubs, spas, saunas, showers, etc. As such, clients can avail these instant chillers at affordable prices from us. So far, our reliability and affordability in the global marketplace has made us one of the noteworthy Instant Water Chiller Manufacturers, Exporters and Suppliers from India.

Applications :

- Water Plants
- Soft Drink Plants
- Power Generation Units
- Cement industries
- Food industries
- Club
- Saunas
- Spas and showers
- Gymnasiums

Features :

- High efficiency PHE
- Automatic
- Instant cooling
- Anti-corrosive hydrophobic fins for long life
- High efficiency scroll compressor
- Compact design
- Easy installation
- Low noise and vibration

OUR PRODUCTS

Centralized Water Cooling System

Centralized Water Cooling Systems are used for cooling water in several commercial and industrial areas. Quickbird Refrigeration And A.C. Works brings forth an elite array of Water Cooling System that is available by us at the cost-effective prices. We also provide you the customized design of this cooling system, which are designed perfectly to join with plastic or S.S. insulated tanks. Including all these, its high built nature ensures optimum functionality and long lasting-life. Owing to our large networking areas in the global market, we are highlighted as one of the reputed Centralized Water Cooling System Manufacturers, Exporters and Suppliers from India. Our cooling systems are available in various specifications, which can meet the desire expectations of various customers from worldwide.

Features :

- High quality
- Long lasting
- Reliable performance
- Long lasting
- Withstand adverse conditions
- Efficient performance
- Robust construction

Applications

- Hostels
- Hotels
- Canteens
- A host of other hospitality industry segments
- Hospitals
- Restaurants

WATER HEATING AND COOLING SYSTEM

Quickbird Refrigeration And A.C. Works is presenting newly designed Water Heating system and Water Cooling System, which is highly appreciated for its excellent performance all along with long functioning life. Till now, our skilled Manufacturers have prepared highly advance water heating cum cooling system that can save power up to 80%. These are Dual Cooling & Heating Systems that helps to provide chilled and hot water using lowest power and low initial costs as well. Owing to these features, we are counted amidst the trustworthy Water Heating System Manufacturers, Exporters and Suppliers from India. The requirement of Chilled Water and Hot Water is one of the most important needs of every hostel, hospital, hotel, home, etc. A number of systems have been developed for these purposes and now the market is full of heating and cooling systems and there are number of choices available to a customer for selecting water heating and cooling system.

Selecting The Right System : It is a very important decision that any individual or organization must understand. Some factors which must be remembered while choosing the right system are:

Dependability : The System must work with good results in all the seasons. It must be dependable.

Efficiency : It must consume less energy and give more work.

Life Cycle Cost (LCC) :

A water cooling or heating system is not a one time investment like other machinery. It has two components that include Initial and Operating Cost. The sum of these two is the life cycle cost. Even if the initial cost of a system is low but if its operating cost is high, it proves to be much costlier in the due course of time.

Payback : The duration in which the system saves you the money equivalent to its own cost.

Space Required To Install It : The system should occupy less floor space and should not be bulky. It must not spoil the look of your building.

Eco Friendly : The system should be Eco-friendly i.e must not increase global warming or ozone depletion. It must not pollute the atmosphere.

RO AND UV PURIFIER SYSTEM

Quickbird Refrigeration And A.C. Works is a booming industry that is engaged in manufacturing and supplying various range of RO And UV Purifier System. Our ranges include Domestic RO System and Industrial RO System that are manufactured by using optimal grade of materials under the strict vision of quality experts. Our Water Purifier System is extensively demanded in various countries due to its exclusive quality and affordable prices. All these are mostly utilized for the lessening the dirt particles, components of magnesium, calcium and other ions in hard water. As such, these hard ions can cause various dangerous effects. Our vast range of RO systems is rich in quality and it can meet as per your expectations and budget as well. Such affordability in the product range has made us one of the reckoned RO And UV Purifier System Manufacturers, Exporters and Suppliers from India.

Domestic RO System

Quickbird Refrigeration And A.C. Works is offering Domestic RO System that helps in providing you luculent water all the way through killing all the impureness that is occupied in the water. It is newly designed Domestic water treatment system that is used for making mineral water using RO technology. We are enlisted as a noteworthy Domestic RO Water System Manufacturer from India, and so our designs are made with full perfection.

Domestic RO System is used in various sectors like home, Aquarium keepers, schools, hospitals, etc. Also, we are one of the prime Manufacturers of Domestic RO System. Our RO systems are designed for long life and protection. These purifiers are completely perfect for purifying the water with easiness, in order to make it safe and healthy. These are easily installed and are offered at reasonable cost. Therefore, our company is acclaimed as one of the reliable Domestic RO Water System Suppliers, Manufacturers and Exporters from India.

Applications

- Domestic drinking water
- Hospitals
- Public Aquariums
- Universities
- Industries

Features :

- Multi-stage system
- Longer service life
- Applications of Domestic RO System
- RO technology used
- Complete purity and protection

Industrial R.O. System

The use of Industrial RO System has enlarged beyond water conditioning, in order to include the removal of harmful organic and inorganic pollutants from a complete chain of solutes. The main improvement in these systems during the water filtration procedure has allowed them to be capable for not only removing dissolved minerals that cause water hardness but also for reducing those harmful chemicals, bacteria, parasites and waste from organic materials found in any water source. Quickbird Refrigeration And A.C. Works is considered as a leading Industrial RO System Manufacturer from India, that are available in compact size and optimum quality. Owing to our products reliability and high strength features, our company is counted amongst the trustworthy Manufacturers, Exporters and Suppliers of Industrial RO Water System from India.

Applications :

- Pharmaceutical
- Power
- Food & Beverage industries
- Other industries

Features :

- Reduced energy consumption
- Improved desalination process
- Use of sustainable energy sources
- Easy waste management
- Application Areas of Industrial RO System
