About Us

Royal Gulf International is a reputable manufacturer, supplier and exporter of cuttlefish bone, specializing in delivering high-quality, natural cuttlefish products to clients worldwide. Based in Tamil Nadu, India, the company leverages its strategic location and expertise in the marine product industry to provide premium-grade cuttlefish bone for various applications, including pet care, agriculture, and crafts.

Core Products

Royal Gulf International focuses primarily on cuttlefish bone, a product valued for its high calcium content and lightweight, porous structure. The company sources cuttlefish bone from trusted marine environments, ensuring purity, freshness, and quality in every batch. Known for its natural benefits, cuttlefish bone is a sought-after product in:

Packaging Options Now Available

Royal Gulf International now provides Loose Bulk Packing and Retail Blister Pack options for its cuttlefish bone products:

Loose Bulk Packing: Perfect for wholesale buyers needing large quantities, this option is designed for efficient transport and storage, ideal for distributors and bulk purchasers.

Retail Blister Pack: Tailored for retail markets, this individual blister packaging ensures each cuttlefish bone remains fresh and protected. This format is convenient for retail stores, making it easy for end consumers to purchase and use.

These new packaging options ensure flexibility and convenience, catering to the needs of both wholesale and retail customers.

Pet Care: Ideal for birds, reptiles, and small animals, cuttlefish bones provide essential minerals, promote beak health, and serve as a calcium supplement.

Crafts and Other Applications: Due to its unique structure, cuttlefish bone is used in carving, jewellery making, and even as a Mold material for casting.

Quality Assurance

Royal Gulf International is committed to stringent quality control standards. The company ensures all products undergo thorough inspection and packaging processes to meet international standards, guaranteeing that customers receive products of the highest quality. By prioritizing sustainability and eco-friendly sourcing methods, Royal Gulf International supports environmentally responsible practices in the marine product supply chain.

Global Reach

With a robust logistics network and international partnerships, Royal Gulf International has established a strong presence in markets worldwide. Its extensive export operations ensure

About Us

timely delivery, flexible packaging options, and customized orders to meet the specific needs of clients in various regions.

Royal Gulf International is Sree Sastha Group's leading & trusted expertise in exporting premium quality Dried Cuttlefish bone. It's also known as squid bone, cuttlebone, in the English name, is ENDOCONCHA SEPIAE, this bone is the backbone of the cuttlefish, it is the chalk-like, foamy, hard yet brittle internal structure of a cuttlefish, in the cuttlebone is calcium carbonate, it is covered with tiny holes that the cuttlefish can fill with water or air. In the past, cuttlebones were used to make polishing powder. This powder was then added to toothpaste to make it look white. This is a calcium-rich material that is a good source of nutrients for caged birds and other pets. Mostly cuttlefish is available in the Indian Arabic Ocean.
