

We take this opportunity to introduce ACOSUTIC ONE as an acoustics & soundproofing Service provider Company who has pioneered in providing high performance soundproofing and noise controlling solution, by using world class products.

ABOUT US

We take this opportunity to introduce ACOSUTIC ONE as an acoustics & soundproofing Service provider Company who has pioneered in providing high performance soundproofing and noise controlling solution, by using world class products.

The need for soundproofing and acoustical treatments for commercial & residential has been growing dramatically during the past few years. Noise pollution is out of control in our expanding cities and suburbs. Numerous studies have shown the adverse effects of noisy environments on sleep, learning, productivity and the overall quality of life. Sound proofing is a common word nowadays, but understanding the aesthetics of this before investing is very crucial. Basically, two components of building acoustically designed rooms is soundproofing and acoustic performance, which are not exactly the same. Soundproof, ideally means that the room or any unit requiring the same should be totally isolated from noisy surroundings by isolating the walls and ceilings. That is because sound waves/vibrations are transmitted through structural elements, concrete walls, etc. therefore you need to isolate them before acoustically treating them for better sound attenuation. Sound Isolation / abatement will not help you with acoustic quality of the room, but will have everything to do with soundproofing. Once the room or unit has been properly isolated from external sound, the second component is to enhance the acoustic performance of the room using high NRC products like acoustic foams etc. which enhance the sound quality within the room.

ACOUSTIC ONE can identify and solve these soundproofing & acoustic performance issues in commercial, residential, educational, scientific and recreational environments. We provide a comprehensive range of products for noise barrier and acoustical solutions for the homeowner, commercial, contractor and architect. We also offer professional acoustic services to help you solve all of your acoustic and noise issues and custom design as per your requirements within your budget. We know no two acoustical solutions fit the same project and we modify our absorptive and Isolation/reflective acoustic barriers to meet the needs of our clients. We offer a wide range of acoustic panel wall systems, noise enclosures, reflective wall surfaces, absorptive wall panels, acoustic curtains, acoustical doors & windows. The solutions cut across all sectors. The solutions can be 'tailor made' for Residential/ Commercial and Industrial purposes. Please check us out to see all that we offer and contact us with any questions, we are happy to help you find the acoustical solution you are looking for.

Acoustic One, founded in 2000, is a prominent manufacturer of a diverse range of Acoustic Products and services provider of divers range Sound Proofing and Acoustic Material such as Acoustic Panels, Ceiling Tiles. Sound Barrier, Vinyl Sheets and complete Auditorium installation and many more.

We also provide our products in a variety of specifications to satisfy the unique needs of our customers. Our products are extensively utilised in a variety of sectors and are highly valued by our customers for their user-friendliness, proper stitching, and excellent finishing.

We are backed by a modern production unit that is outfitted with cutting-edge equipment and machinery, allowing us to provide the highest quality goods to our clients.

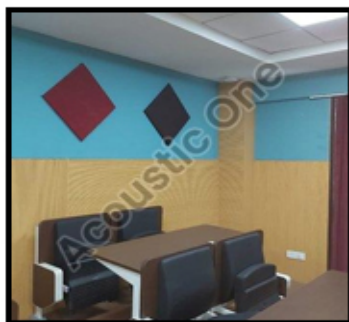

Client Satisfaction

We offer the most dependable and effective items to our consumers. We see the customer as the most precious asset, and as a result, we care for them better than others in the same market. Delivering excellent products has helped us build a sense of belonging in our consumers, assisting us in retaining existing customers once obtained.
