ABOUT US

Candor Water Tech has created a name in the industry for providing integrated utility solutions to prestigious customers. We are aware of the requirements of the customers and industry. Our company is engaged in manufacturing and supplying a wide range of water treatment plants and installation, operation and maintenance services. Under the leadership of Mr Amarjeet Singh, we are offering quality products to offer a complete solution.

Quality Commitment

With the help of our dedicated and professional experts, we are offering the most efficient and innovative products to our valued customers. We are offering the best quality products like Ultra Filtration water systems, water purifying filter systems, solar vacuum tube systems, tube settler systems etc. Apart from products, we are offering water treatment plant AMC services, wastewater testing services, and solar water heater repair services. Our products are known for durability, functionality, low maintenance and excellent design. We are using high-quality raw materials and advanced technology for manufacturing high-quality products.

Our USP

Our skilled and experienced professionals ensure the quality range of products to the customers at market-effective rates. We have sophisticated infrastructure and offer superior quality products that can be customised as per the specifications of the customers. We are also manufacturing Reverse Osmosis Plant that provides clean water for drinking. Due to our excellent quality of water softener system, our products are highly acknowledged in the market. We are offering after-sales services to our customers for complete customer satisfaction.
