

2000

The Company **SLK ENGINEERING WORKS** has innovated the Industrial Machinery manufacturing to a superior grade level by leveraging on its expertise of over 20+ experience years.

The Company SLK ENGINEERING WORKS has innovated the Industrial Machinery manufacturing to a superior grade level by leveraging on its expertise of over 20+ experience years. Since 2000 we are developing High quality Roots Blowers (Roots Twin Lobe Type Blowers), Roots Rotary Lobe Blower, Dry Vane Pump (DVP), Vacuum Booster, Air Blowers, Three lobe Roots Type Boosters, Roots Blower Spare Parts, Roots Blower Accessories, etc. These have helped us attain a notable position of reliable exporter, manufacturer, trader, supplier and service provider.

Quality

Our company manufacture and supply best-in-class products to the leading companies all across India. Our products are regularly audited to ensure that the products which are supplied possess high quality and each blower is tested for immense performance and mechanical operation prior to their dispatch in markets.

Design & Engineering

The designing of Blowers and packages at our company is undertaken by qualified engineers. They make use of computed selection programs and CAD technology software as per latest market trends. This ensures accurate selection of ancillary equipment and blowers resulting in prompt delivery of exact documentation.

Experience

SLK ENGINEERING WORKS has been manufacturing & supplying vacuum boosters and quality blowers to numerous leading manufacturers and sub supplier across India since 2000. Since then, we have built up an unmatched experience in blowers designing and manufacturing to handle various gases in a wide conditions for applications and operating.

Some of the gases handled by our products include: Butane; Acid Vapours; Oxygen; LPG; Hydrocarbons; Hydrogen; Propane; Steam; Nitrogen; Methane; Chlorine; Natural Gas; Carbon Dioxide; Sulphur Dioxide and VCM.
