Pierceable Sealing Films (For General Applications)

Maxo Pierce films are easily pierceable by pipette tips for sample recovery.

Zone-Free films feature adhesive-free top layer with a inert white polypropylene/ adhesive sublayer. The easy-piercing top layer allows direct sample recovery with pipette tips without adhesive fouling and minimizes adhesive contact with samples. X-Pierce™ films are designed for temporary protection of samples in multiwell plates. Precut "X" over each well creates four flaps that easily bend downward when pushed by pipette tip allowing sample access without adhesive fouling.

The flaps return to their original position after sampling for continued protection.
