## Metallic Pall Rings

Metallic Pall Rings-Q Pak is a progressive die tool products and Q Pak is an excellent improvisation of the traditional pall rings and is considered to be the most efficient ring type packing. With more numbers of internal strips the interactive area increases for gas liquid contact, so these types of Metallic Pall Rings maintains the efficiency of packing when compared to normal pall rings. With the same efficiency they give lower pressure drop than ball ring.

## Slotted Rings

Slotted Rings is a modified design of Metallic Slotted Ring, now being manufactured by us. They are affordable in cost due to flared thin wall construction. The Slotted Rings offer all the technical advantages of Pall Rings, V - Pak, Hy-Pak, K - Pak, M - Pak and Cascade Mini Rings and any other type of Slotted Rings being manufactured by others. In actual practice, there may be deviations due to special conditions.

## IMTP Rings

We offer IMTP Rings which is made of metal sheets and give the best performance with relation to low pressure drop and high efficiency. These packings are made in progressive die tool with complete precision to ensure the best quality. These random Packings are available in various metals such as carbon steels; Stainless Steel all grades and other special alloy steel grades.

# OUR PRODUCTS

## Sieve Shaking Machine

We provide highly efficient Sieve Shaking Machine which is ideally suited for carrying out sieve analysis of different materials in dry conditions. The body of Sieve Shaking Machine is made of cast iron and the base is made of M.S. sheet. Top rotating plate is made of cast aluminium complete with arrangement for fixing 8" cum 12" sieves [7-8 nos] with lid and receiver.

## Test Sieves

We manufacture and supply the best quality Test Sieves in the market. The Test Sieves that we offer are very efficient and available in the specifications conforming to the international standards. We can also develop and design custom made Test Sieves.

In Brass and SS304 Frame 8" /12" /4" /18" DIA
