

S.G. MECHANICAL WORKS

www.sgmechanicalworks.com

About Us

S. G. Mechanical Works is an ISO 9001:2008 Certified Manufacturer, Supplier and Exporter of Industrial Mixers, Hammer Mill, Feed Plants, Pellet Mill, Materials Handling Equipment, Sieve Machines and Crumbler Machines. We are offering excellent & precision-engineered plants and machinery to support of cattle or cow feed industry, poultry or chicken feed industry, animal feed industry, wood pellets industry, agro waste industry and many others.

Keeping superior quality and customer satisfaction as the topmost priority, today S. G. Mechanical Works is in the position to become a major player of this particular market. Our plants and machines run by manual, semi-automatic, fully automatic with auto batching according to desire of customer choice. Being in the line for over 2 decades, S. G. Mechanical Works specializes in the manufacturing of feed & pellets making machinery and plants.

Our organization was started in 1992 by Late Sh. Krishan Lal (Mechanical and Boiler Engineer). Now, we are heading towards peak of excellence under the supervision of Smt. Jaswant Kaur. Based in Punjab, we have established a strong foothold in the global market.

Our Quality Assurance

We are an ISO 9001 : 2008 company, which itself speaks volume of our credibility and efficiency. Each and every consignment is closely monitored, which ensures complete satisfaction of our valued customers. Quality checks start from product sampling to final shipment. The status on product sampling, development and shipment is regularly conveyed to buyers. Quality is monitored in all the stages.

Manufacturing Unit

S. G. Mechanical Works has two manufacturing units for serve to worldwide. One unit name is S. G. Mechanical Works with area 13000 square feet and second unit name is S. G. Mechanical Works with area 4800 square feet. Our machinery and plants are set up on the basis of modern techniques. Also, our machinery and spares are composed of the finest raw materials that make it stiff from its foundation itself. Tests have shown that our machinery and spares are apt for any heavy duty on any given day. At top of that, our high-tech machinery and spares are rated at the least rates in the market.

Customer Satisfaction

Since our inception, we endeavor to provide utmost satisfaction to our clients. For this, we keep on improvising our existing range and design innovative machinery and equipment in diverse designs and specifications. Our uncompromising attitude towards maintaining the quality in all our aspects has allowed us to generate huge appreciation from our clients. We upgrade our manufacturing techniques and other facilities to elevate our standards and keep pace with the prevalent market trends. The satisfaction level of our clients is clearly evident from by the repeated orders that we get due to the excellent sales, services, corporate ethics and great customer relationship.

Our Strengths

We are one of the reputed names in manufacturing and supplying of equipment and plants for the animal food processing industry. Following are some of the reasons that have made us the preferable choice for our clients why we are most preferable with our clients :

- High performance
- Durable products
- Timely delivery
- Customized solutions (on packaging also)
- Client centric approach
- Ethical business policies
- High quality

Our Products

Feed Plants

Our range of Feed Plants embodies engineering skills and efficiency of our professionals. Our professionals precisely design Feed Plants so as to ensure their efficiency. Our range of Feed Plants has gained appreciation owing their remarkable workability and low operating cost.

Highlights

- Longer functional life
- Non-corrosive housing
- Low operating cost
- Excellent performance
- Capacity range : 1 MT/H to 80 MT/H

Pellet Mill

We are a veritable Pellet Mill Manufacturer, Supplier and Exporter based in India. Our range of robust quality Pellet Mill is far famed for its high efficiency. We also manufacture and export excellent quality horizontal Pellet Mill. Our Pellet Mill is meant to be used in flied of animal feed, poultry feed, rabbit feed, aqua feed, solvent oil mills etc. Lastly we offer very reasonable prices for these highly durable pellet mills.

Highlights

- Longer functional life
- Non-corrosive housing
- Low operating cost
- Excellent performance
- Horizontal pellet mill is use and suitable for small scale to high scale requirement for make the pellets.
- Pellets size : 2.5 mm to 20 mm
- Capacity range : 200 kg/h to 50 mt/h

Industrial Mixers

We are offering our valued clients a technically advanced range of Industrial Mixers. Owing to their significant attributes such as longer service life and efficient performance, these Industrial Mixers receive exceptional appreciation. Industrial Mixers are designed to be used in cattle feed industry, poultry feed industry, fish feed industry and many others

Highlights

- Designed for trouble-free service
- Unique Tumbling action giving good accurate mixing
- Slow moving "soft mix" action eliminates product damage and degradation
- Within five minutes an excellent homogenous mix is prepared
- **Capacity range : 200 KG/H to 30 MT/H**

Our Products

Hammer Mill

Our quest for excellence has inspired us to design and develop efficient Hammer Mill. Designed to perfection, comprises of two functions such as grinding and grading. Hammer Grinding Mill gives cool grinding in one direct operation. The grinding specifications can be adjusted changes of perforated screens, which can be done within minutes.

Highlights :

- Swinging Hammers
- Four Time reversible hardened and shaped for best grinding efficiency
- Simple feeding adjustment
- **Capacity range** : 1 MT/H to 40 MT/H

Bucket Elevator

With the support of our engineers, we are able to provide clients with the best Bucket Elevator. Owing the dedication of our team members, we have successfully embodied innovation in our Bucket Elevator. Designed to excellence, Bucket Elevator is designed to be used for lifting the material in 90 degree. Bucket Elevator is provided with divider flap which is used to change the way of outlet materials. Divider flap is available in two ways, three way and four way design.

Highlights :

- Robust construction
- Non-corrosive housing
- Excellent design
- Easy to maintain
- **Capacity range** : 1 MT/H to 50 MT/H

Industrial Conveyors

We bring forth the best range of Industrial Conveyors for valued clients. These Industrial Conveyors are meticulously designed and developed keeping in mind ISO standards. Owing to the significant attributes of Industrial Conveyors, we have cornered the market. Further, our Industrial Conveyors are widely appreciated for their ability to lift and carry heavy material efficiently.

Highlights :

- Robust construction
- Non-corrosive housing
- Excellent design
- Easy to maintain
- **Capacity range** : 1 MT/H to 60 MT/H

Our Products

Pellet Cooler

Being a quality-oriented organization, we never compromising on the quality aspect of Pellet Cooler. We precisely design Pellet Cooler using highly efficient components, procured from the established vendors of the markets. The design of Pellet Cooler facilitates easy operations. Pellet Cooler is used to cool the pellets. Counter flow cooler (C.F. Cooler) is use for best cooling the pellets with ducting blower, ducting pipeline, cyclone. We deal in horizontal cooler which is used to cool the pellets for small scale and also use for different purpose.

Highlights :

- Robust construction
- Non-corrosive
- Excellent design
- High compressive strength
- Capacity range : 1 MT/H to 50 MT/H
- Horizontal cooler capacity range : 1 MT/H to 10 MT/H

Molasses Pump

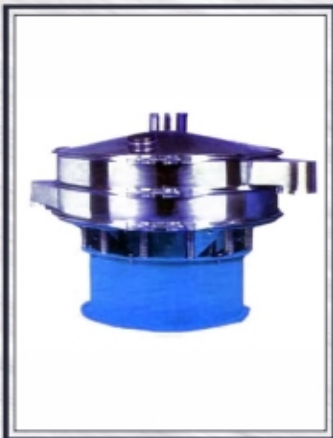

Our organization is widely appreciated for making available Molasses Pump. Stringent quality approach has been adhered during entire production process to achieve impeccability. Our range of Molasses Pump is widely appreciated for its non-corrosive properties and high compressive strength.

Highlights :

- Robust construction
- Non-corrosive
- Excellent design
- High compressive strength

Application Areas : Used in wood pellets industry, agro waste industry, animal feed industry.

Sieve Machines

Our valued clients can avail from us quality Sieve Machines. These Sieve Machines are evident of great concept and excellent engineering. Longer service life, efficient performance and low operating cost are the major factors that have taken demand of Sieve Machines to its peak. We offer Sieve Machines in different technical specifications.

Highlights :

- Robust construction
- Non-corrosive housing
- Excellent design
- Easy to maintain
- This machine is used to separate the granules from finish products and raw material
- Used in wood pellets industry, agro waste industry, animal feed industry, flour mill industry, rice mill industry
- **Capacity range :** 1 MT/H to 50 MT/H

Our Products

Automatic Bagging Machine

We are one of the prominent Manufacturers, Suppliers and Exporters of Automatic Bagging Machine. Conforming to the parameters of ISO 9001: 2008 certification, Automatic Bagging Machine ensures efficient performance. Automatic Bagging Machine is used to fill the bags with exact weight with auto function. Automatic Bagging Machine has function for control 25 KG to 100 KG bags with auto bagging process along slat conveyor.

Highlights :

- Robust construction
- Non-corrosive
- Excellent design
- High compressive strength

Application Areas : Used in wood pellets industry, agro waste industry, animal feed industry,

Electrical Control Panels

Our valued clients can avail from us quality Electrical Control Panels in different specifications. These Electrical Control Panels are used to control the electrical motors in cattle feed industry, poultry feed industry, fish feed industry, wood pellets industry, agro waste industry and many others. These Electrical Control Panels are dust proof and ensure efficient performance.

Highlights :

- Robust construction
- Non-corrosive
- Excellent design
- High compressive strength
- Outstanding engineering
- **Capacity range :** 1 K.W.(Kilowatt) to 1000 K.W.(Kilowatt)

Bulk Feed Tanker

We are engaged in manufacturing, supplying and exporting the best Bulk Feed Tanker. Our Bulk Feed Tanker vehicle is used for carrying the bulk feed or material. Direct loading in bulk feed or materials tanker and unload the bulk feed or materials by tanker conveyors till 35 feet height. With Bulk Feed Tanker, feed millers and customers can save loading, unloading, packing and Ginny bags expenses.

Highlights :

- Robust construction
- Non-corrosive
- Excellent design
- High compressive strength
- **Capacity of storage range :** 4 MT to 13 MT

Our Products

Pellet Mill Spare Parts

We bring forward the best range of Pellet Mill Spare Parts for our valued clients. These Pellet Mill Spare Parts include pellet dies and press rolls for use in pellet mills. We also manufacture Pellet Mill Spare Parts with accurate design using superior quality material.

Highlights :

- Robust construction
- Non-corrosive
- Excellent design
- High compressive strength

Crumbler Machines

We are one of the prime Manufacturers, Suppliers and Exporters of Crumbler Machines. Innovative design and excellent performance of Crumbler Machines receive accolade from our valued clients. These Crumbler Machines are based on advanced technology, ensuring efficient performance along with low operating cost.

Highlights :

- Robust construction
- Non-corrosive housing
- Excellent design
- Easy to maintain
- This machine is used for crumbs the pellets
- **Capacity range :** 500 KG/H to 40 MT/H

Application Areas : Used in wood pellets industry, agro waste industry, animal feed industry, flour mill industry, rice mill industry

Wood Chipper Machine

We are one of the prominent Manufacturers, Suppliers and Exporters of Wood Chipper Machine. Our Wood Chipper Machine is appreciatively used in wood pellets and agro waste industries to crush the agriculture waste and wooden material very well with no problems of moisture. Our Wood Chipper Machine is a true example of fine conceptualization and engineering.

Highlights :

- Robust construction
- Non-corrosive
- Excellent design
- High compressive strength
- **Capacity :** 1 MT/H to 6 MT/H
