WHO WE ARE?

Vistaar Systems as one of the leading manufacturer of HVAC equipment is committed to create environmentally responsible building solutions that deliver energy performance, reduce power consumption and decreases life-cycle costs. We are committed to reduce our own impact on global climate change and motivate others do the same. In addition, we support green building initiatives by investing resources in the various industry committees and expertise in designing and manufacturing energy-efficient Air Handling products for HVAC applications.

Green Buildings Demand for environmentally responsible buildings *are* growing as realized by users and hence it is no more considered as a cost but as an investment. Green buildings are designed keeping energy efficiency, comfort, and sustainable materials in mind. At *Vistaar*, we understand the importance of supplying our customers an Air Handling Systems that should meet and conform to environmental standards while focusing on green-build initiatives that contribute to a more sustainable work environment. With architects, designers, customers, suppliers and our employees, *Vistaar* embraces environmental responsibility. As a leading supplier of HVAC systems and services, *Vistaar* is prepared to help the stake holders achieve their green building goals.

Vistaar custom made air handling units are specially designed to meet the most stringent project specifications for applications such as Hospitals, Pharmaceuticals, Process Industries, Hospitality, Institutions and industry clean rooms. *Vistaar* modular air handling units are based on a robust casing design and high quality components to provide the highest quality and reliability available in the market.

We, as one of the leading HVAC equipment manufacturers, can provide the exact solution. Our experience and expertise in designing, commissioning and maintaining HVAC systems not only guarantees a solution, it also gives you complete efficiency and peace of mind.

The *Vistaar* air handling units delivers Superior performance, Highest quality and reliability, Customized design, Lower energy consumption & Lower installed costs. Our products are well tested for performance as per the design condition for longevity, sustainability and durability.

* AHU - CEILING SUSPENDED UNIT

CAPACITY RANGE » 800 to 12000 CFM

APPLICATIONS » Comfort Air-Conditioning For Shopping Malls, Multiplexes, Small offices

FEATURES » Compact, low height, with single / Twin centrifugal fan

^ SINGLE & DOUBLE SKIN CEILING FAN COIL UNIT

CAPACITY RANGE » 400 CFM (1 TR) to 1200 CFM (3 TR)

TYPES » Chilled Water / Direct Expansion

APPLICATIONS » Comfort Air Conditioning for Hotel, Hospitals, offices, Class rooms, SMdio, Shopping Malls

FEATLRES » Casing Made out of Pre coated/Galvanized/Power coated sheets
Sandwiched insulated drain pan with expanded polystyrene
Vibration free, noise less, single phase direct dryen motor with

OPTIONS Tree way Mixing/Diverting Valves
Ball Valve set

^ AIR WASHER

CAPACITY RANGE » 1000 CFM upto 100000 CFM

TYPES » Pad Type Airwasher

APPLICATIONS » Hotel, Hospital, Industry, Colleges, Theater

FEATURES Fill Type system can attain very high saturation efficiencies as against conventional system. Power consumption negligible as compared to spray machine due to low pump power and low pressure drop. Quick installation as machine is factory fabricated and tested and has flexibility in regard to re-ovation at a later date. Compact pre-fabricated design to take less space, consuming only 40% of conventional systems. Power consumption negligible as compared to spray machine due to low pump power and low pressure drop. Quick installation as machine is factory fabricated and tested and has flexibility in regard to re-location at a later date.

OPTIONS » Double/Single skin, Masonry type, Water Tank in Stainless Steel-202/304, Cooling Pad 200/300mm PVC Eliminator Water Pump, Intake louvers & bird screen

^ AIR SCRUBBER

CAPACITY RANGE » 10000 CFM up to 100000 CFM

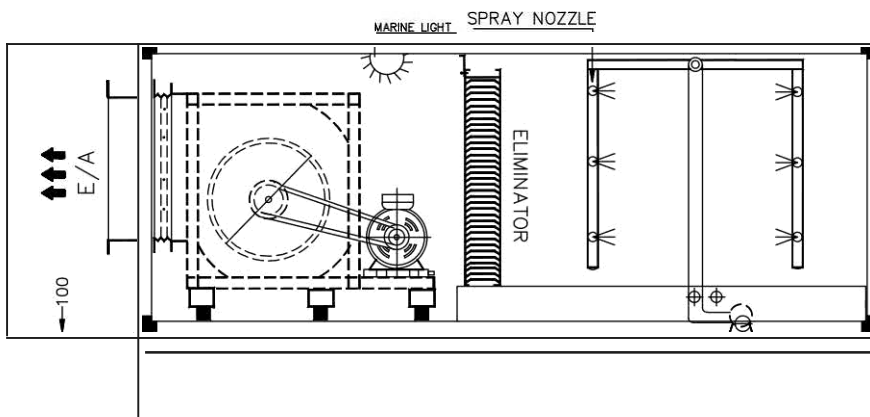

TYPES » Wet Type / Dry Type

APPLICATIONS » Hospital, Hotel Kitchen, College, Industry and other

FEATURES » Corrosion resistant AMCA rated fan on the inlet or outlet side of the scrubber. Corrosion resistant recirculating pumps for scrubber liquid recirculation fan-plugging spray nozzles for wetting packing in a wide range of corrosion resistant materials. Moisture eliminators with chevron, mist pad or loose fill type designs

OPTIONS » Double / Single Skin
 Water Tank in Stainless Steel 202/304
 Eliminator section, PVC /GI Eliminators
 Backward corvtd blower
 Double bank filter section
 Single / Double bank spray chamber

^ AXIAL FLOW FANS

Vistaar, Axial Flow fans are designed for air ventilation in commercial or industrial building and are available from 315 mm dia to 1800 mm dia that covers the CFM up to 100000. The blade pitch is field adjustable to accommodate system changes. The casing design and construction are well suited for indoor or outdoor applications and can be easily installed in ducted or non-ducted systems. Fans & blades are designed to reduce operating cost with improved efficiency design offers inherently lower sound level than other axial fans.

Types

Axial flow fan (Normal Series)
Axial flow fan (High Temp. Series for 250 & 300 up to 2 hrs)

Options

Pedestal Stand
Bird Screen
Sound Attenuator

Application

General Ventilation
Emergency Smoke and Heat Exhaust
Car Ventilation / Basement
Stairwell pressurization

Construction

Fan casing is made of heavy gauge M.S. Sheet. It has flanges at both ends for easy fixing. Impellers are made of Die cast aluminium having Aerofoil design with adjustable pitch angle. Maintenance free reliable IEC motors.

COILS

We Manufacture Coils in 1/2 & 3/8 for the commercial and industrial applications. These coils can be made from 2 row to 12 row deep.

We, Plays a very important role in procurement of copper tube and aluminium foil from across the globe to maintain the international standard.

Features:

- Aluminum foils with or without hydrophilic coating
- End plate stainless steel/Galvanized iron
- Dimensions accuracy

- Direct Expansion
- Chilled Water
- Heating

Options:

- Copper header
- Inter-Mined coil

HEPA FILTERS

The standard HEPA Filters enables better than Class 100 conditions. These filters can be directly installed in AHUs or mounted in banks in separate single skin plenums. Following are the construction features of our range:

- Efficiency 95 down to 0.5 µ
- Filter media synthetic non-woven deep pleated
- Frame material: Aluminum/GI/SS/MS
- Frame type box / Flange

FILE FILTERS

Are widely used in pharmaceutical, clean room, semi-conductor biotechnology, photo film, optical, precision, mechanical, critical, O.T., defense, air handling units and air conditioning etc as secondary or final filter. These filters are resistant to chemicals & organic solvents. Following are the construction features of our range:

- Efficiency 90 down to 10 µ
- Efficiency 90 down to 20 µ
- Filter media synthetic non-woven /Al wiremesh
- Frame material:
 - Thickness available: 25mm/50mm

PRE FILTERS

Are widely used in air conditioning, Air Handling Units, pharmaceutical, clean room, semi-conductor biotechnology, photo film, optical, precision mechanical, critical O.T., defense etc as Pre Filter and riser filters. following are the construction features of our range:

- Efficiency 90 down to 10 µ
- Efficiency 90 down to 20 µ
- Filter media synthetic non-woven /Al wiremesh
- Frame material: Aluminum/GI
- Thickness available: 25mm/50mm

FILTERS

^ ACCESSORIES

Accessories are the most important parts in any product it can change look & finishing quality of products. Zonex takes the responsibility to use suitable genuine accessories placed in different machines & keep on upgrading all accessories through continuous improvement which makes our Products different from others. We can also provide customized accessories as per the needs.

FRAMEWORK

Corrosion resistant aluminum profile with specially designed 3-way corners. (Thermal break on demand)

FRAME PANELS

Double skin sandwich panels fabricated from inside with 0.63mm (24 G) galvanvanized sheet steel and outside with 0.63mm (24 G) pre-coated galvanvanized sheet steel. The panels have infilled insulation of 40 Kg/m³ density puf injection/pufslab, resulting in high rigidity and sound attenuation characteristics.

BASE FRAME

Base frame is made of galvanvanized steel with die cast aluminum joints having lifting holes.

CONDENSATE DRAIN PAN

Drain pan can be made of aluminium/ G.I / S.S with dual slope to facilitate immediate discharge of condensate. Specially designed drain pan with all rounded edges allow complete cleaning and avoid microbial growth.

FAN SECTION

Nicotra or Kruger centrifugal fans are used either SISW or DIDW type with forward curve or backward curved driven with belts as per static pressure requirements.

CELDEK PAD

Cellulose pad is used in evaporative cooling unit. It is cross corrugated coated with anti rot, rigidifying & wetting resins makes the material stiff and self supporting.

INSPECTION GLASS

Port Hole Used In Air Handling Unit Sight Window For Checking Operation In Machine.

HINGES & LOCKS

Access doors are provided with hinges and locks made of self-extinguishing nylon for perfect air tightness.
