

EVOLUTION HEALTHCARE PVT. LTD.

DIABETIC FOOT CARE PRODUCT

PRESENTED BY DR. DILLIP KUMAR SAHOO

NORMAL DIABETIC SHOE

- Diabetic shoes **decrease the risk of diabetic foot ulcers and thereby reduce amputations.** They provide support and protection while minimizing pressure points on the feet. They also have extra depth to accommodate diabetic inserts. There are many styles to choose from, and the shoes look much like any other shoe.
- **Diabetic shoes are often wider and deeper than regular shoes** to accommodate a special multi-density insert that is designed to reduce pressure and callouses to the bottom of feet. Diabetic shoes have a larger “toe box” to prevent squeezing of the toes.

- **Who is eligible for the Medicare diabetic shoe program?**
- History of partial or complete foot amputation
- History of previous foot ulceration
- History of pre-ulcerative callus
- Peripheral neuropathy with evidence of callus formation
- Foot deformity

Poor circulation

Price range 2800 to 4800 plus GST

EVOLUTION HEALTHCARE PVT. LTD.

FOR FOREFOOT ULCER

- Price is 3450

EVOLUTION HEALTHCARE PVT. LTD.

4mm Gel

CHARCOT FOOT ORTHOSIS

■ Price 9600 plus GST

EVOLUTION HEALTHCARE PVT. LTD.

WHY EVOLUTION

- Protective interior that is made from soft material, and stitching that doesn't protrude so as not to cause irritation.
- ● Non-binding uppers that insure that there is no pressure on the foot. In contrast, regular shoes often cause pressure in the forefoot area or the back of the shoe as they are often constructed from firm materials and in a way that might irritate bunions, the toes, or back of the heel.
- ● Extra depth design that provides a pressure-free fit and can accommodate thick orthotic inserts.
- ● A deep toe box that provides extra room for toe movement and avoids pressure on the toes.
- ● Lightweight, cushioning soles that facilitate mobility and stability, and reduce impacts on the foot
- Stretchable uppers might be the ideal solution for conditions caused by severe diabetes or neuropathy. These stretchable shoes conform to the contours of the foot and help eliminate pressure points.

PROSTHESIS FOR AMPUTEES

We manufacture

- chopart prosthesis
- Symes prosthesis
- Partial silicon foot prosthesis
- Below knee prosthesis
- Above knee prosthesis and many more

Symes Prosthesis
