About Us

Welcome to Kalinga Agro-Food Industries, a distinguished division of the renowned Kalinga Group of Companies. With a strong presence in diverse industries such as project management consulting, waste management, and BSF flies farming, we have now ventured into the agricultural and food processing sectors.

Aligned with the vision of the Honourable Prime Minister and the governments of Odisha and India, which have declared this year as the Millet Year, we are committed to the mission of promoting millets on the global stage. As an esteemed corporation collaborating with the structured private sector, our aim is to establish a partnership model for the development of millet farming and production.

Nutrient Values:

Why Millets?

A highly nutritious, gluten-free grain that has been cultivated for millennia. Packed with vital nutrients like magnesium, phosphorus, and dietary fiber, millet is a powerhouse for your health. Its easy digestibility and gut-friendly properties make it a smart choice. From comforting porridges to delectable breads, vibrant salads, and flavorful pilafs, millet's versatility knows no bounds. Plus, it's an environmentally sustainable option, requiring minimal water resources. Embrace millet's rich cultural heritage hailing from Africa and Asia. Enhance digestion, reduce the risk of heart disease, regulate blood pressure, and manage blood sugar levels with this incredible grain. Elevate your meals with millet today and experience a world of wellness!

Raw Millets & Ragi Flour

Finger Millet (Ragi)

It has a high nutritional value and rich in proteins, vitamins, minerals, and fibre. Unlike other cereals, millets require little water and soil fertility. The sheer affordability of millets also tags them as “poor man’s food grain”. The world is now noticing millets for their enormous potential.

Finger millet is the richest source of calcium (300–350 mg/100 g).

Ragi has the highest mineral content.

It contains lower levels of protein (6–8%) and fat (1.5-2%).

Finger millet proteins are unique because of their sulphur-rich amino acid contents.

The grains have excellent malting properties and are widely known for their use as weaning foods.

It has high antioxidant activity.

Health Benefits

(Finger Millet: The Powerhouse of Nutrition)

Discover the wonders of finger millet, also known as ragi or nachni, a nutrient-packed grain that is making waves in the health-conscious community.

Health Benefits of Millets

Nutrient-Rich

Millets are packed with vital nutrients like magnesium, phosphorus, manganese, and dietary fiber. They provide B vitamins, antioxidants, and protein, promoting overall health.

Digestive Health

The high fiber content in millets supports healthy digestion, prevents constipation, and maintains a healthy weight.

Gluten-Free Alternative

Millets are naturally gluten-free, making them an ideal choice for individuals with celiac disease or gluten intolerance.

Heart Health

The fiber, healthy fats, and plant sterols in millets help lower cholesterol levels, reducing the risk of heart diseases.

Blood Sugar Management

Millets have a low glycemic index, which helps regulate blood sugar levels and is beneficial for diabetes management and prevention.

Weight Management

The fiber in millets provides a feeling of fullness, aiding in weight management and preventing overeating.

Antioxidant Properties

Millets contain antioxidants that fight harmful free radicals, reducing the risk of chronic diseases and promoting overall well-being.

Nutritional Support

Millets are recommended as a nutrient-dense food for infants and young children, providing essential nutrients during crucial growth stages.

~ Elevate your nutrition with finger millet and experience its remarkable health benefits. Embrace this nutritional powerhouse and savor a healthier, more vibrant lifestyle. ~

Millet Processing

Millet Processing: Ensuring Quality and Market Accessibility

At Kalinga Agro food Industries, we understand the importance of processing millets to meet customer demands and expand market reach. To achieve this, we are establishing 5 to 6 state-of-the-art processing facilities strategically located in Bhubaneswar, Ganjam, Puri, Koraput, Malkangiri, and other key locations. Our commitment is to ensure proper processing, hygienic packaging, and efficient distribution to both local and international markets.

During millet plant processing, the objective is to effectively separate and utilize the various components of the plant. The methods employed may differ depending on factors such as regional practices, available technology, and the intended end-use of the products. Millet is a valuable crop due to its nutritional value and versatility, and proper processing is essential in maximizing its benefits.

Millet Processing

Millet Processing: Ensuring Quality and Market Accessibility

Here's why our millet processing capabilities are a game-changer

Quality Assurance

We prioritize the quality of our millet products. Our processing facilities are equipped with cutting-edge technology and adhere to strict quality control standards. With meticulous processing procedures, we ensure that the nutritional value, taste, and texture of the millets are preserved, delivering a premium product to consumers.

Hygienic Packaging

We understand the significance of packaging in maintaining product integrity. Our millets are carefully packed in hygienic and eco-friendly packaging materials, ensuring product freshness and preventing contamination. The packaging is designed to enhance shelf life, convenience,

Local and International Market Access:

Our robust processing capabilities enable us to cater to both local and international markets. By processing the millets to meet customer specifications and labeling requirements, we expand the market accessibility for our farming partners. This opens up opportunities for increased sales, export potential, and global recognition of Odisha's millet produce.

Support for Farming Community

We assure farmers that their harvested millets will be processed correctly and reach the end consumer effectively. This assurance encourages more farmers to engage in millet farming, knowing that their efforts will translate into valuable products with a guaranteed market. By supporting the farming community, we contribute to the growth and prosperity of the agricultural sector in Odisha.

Machine-to-Machine Buyers

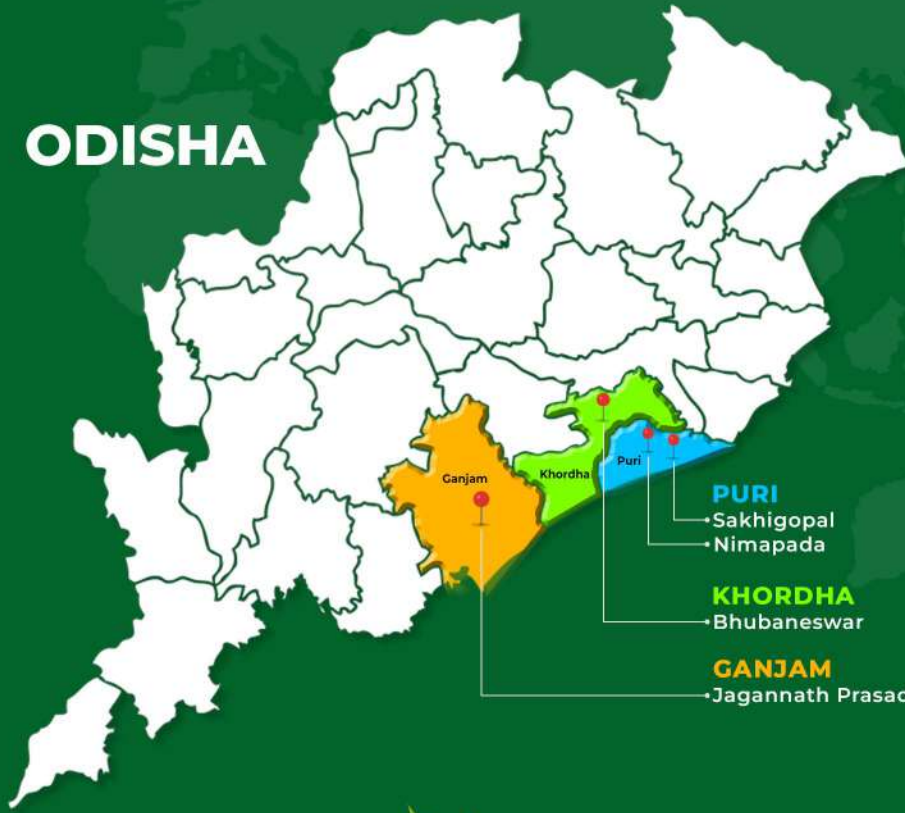

In addition to our own processing facilities, we also cater to machine buyers who have their own millet processing setups. We offer our processing machinery to such buyers who wish to purchase from us again. This partnership model expands our reach and strengthens the millet processing ecosystem, benefiting both buyers and sellers.

Join us at Kalinga Agro Food Industries and experience the advantages of our advanced millet processing capabilities. Together, let's unlock the full potential of millets, ensuring quality, accessibility, & market success.

Explore our website to learn more about our processing facilities, packaging standards, and how we support the farming community. Embrace the future of millet processing with us.
