# ABOUT US

As our brand name suggests, this journey began with the dream & culinary passion of a young daughter from a small city. Inspired by her parents' values of creating employment & improving the livelihoods of rural women, we embarked on this agribusiness venture. Being surrounded by agriculturists, we witnessed the challenges faced by hardworking farmers, which inspired us to turn a lifelong passion into a business that positively impacts many lives.

At Daughter Food and Agro Industries, we manufacture dehydrated vegetables, fruits, & herbs. Our journey has not been without challenges – from raising capital to navigating industry obstacles. However, with perseverance & creativity, we have transformed these hurdles into opportunities for growth & innovation.

## ◆ Our Mission

Our mission is to meet or exceed consumer expectations by providing high-quality, locally-sourced, & responsibly produced nutritional products. We celebrate the richness of our region's agricultural heritage while promoting healthy lifestyles. Integrity, customer satisfaction, & transparency guide everything we do.

## ◆ Our Aim

Our aim is to reach those who have limited access to fresh produce. Our dehydrated products offer a solution by significantly extending shelf life without compromising taste or nutrition. As a daughter-led business, we infuse our products with a unique touch of love & care. Daughter Foods embodies the spirit of women empowerment, & we are dedicated to continuing this mission with heart & dedication.

Our products are designed to simplify cooking and save time, allowing you to spend more moments with your loved ones. With every purchase, you not only acquire healthful food but also contribute to the improved livelihood of local farmers and the empowerment of women in our farm community. Your support makes a huge difference!

We invite you to join us on this journey. Explore our products and become part of the Daughter's family, built on passion, trust, and a commitment to a healthy future.

"Your diet is a bank account. Good food choices are good investments." – Bethenny Frankel
