# KUSH ENTERPRISES

+91-8222850833

[www.kushtechiez.com](http://www.kushtechiez.com)

We would like to introduce our self as a manufacturer & exporter of Complete Food Processing Line and Machinery like Pickle Processing Plant, Tomato Ketchup & Jam Processing Plant, Mango & Other Fruits Juice & Pulp Processing Plant, Soya milk/Tofu line fruit & vegetable washing machine & packaging machinery, Ginger & Turmeric Process Line as per customized solutions. We also deal in various Semi Automatic Bottling line for Tomato Ketchup, Jams and similar kind of products.

We also offer after sales services, which is one of the important factors to remain successful in the industry and customer satisfaction.

KUSH ENTERPRISES is an "ISO 9001: 2015" Certified" ISO 13485:2016 company and also have CE certification and we are serving our clients of the different countries. Satisfaction of customer is our prime concern. We take care of customer needs and offer our services accordingly. We have a complete tool room for in house production and very experienced technicians of the industry of Fruit & Vegetable, Processing Machines and Packaging Machines.

## WATER TREATMENT PLANT (R.O)

The reverse osmosis(RO) water treatment plant is an equipment to purify water with the action of pressure difference of semi permeable membrane. RO membranes can effectively remove majority of organics, harmful substances, bacteria, particulates.

We are the leading manufacturer, trader, and supplier of supreme quality SS Mineral Water Plant. The offered plant is used in various areas such as textile waste water recycling, dyes & chemical industry, pharma industry, dairy and paper, food and sugar industry,

## S.S.TANKS ALL TYPES

We are actively involved in manufacturing and supplying top quality of SS TANKS. Our tanks is extremely required in various food processing plants for its excellent capacity ,srenth And durabiliy . This tank is especially based on our clients requirements as to capacity, size and dimensions

## FILTER PRESS

An industrial filter press is a tool used in separation processes, specifically to separate solids and liquids. The machine stacks many filter elements and allows the filter to be easily opened to remove the filtered solids, and allows easy cleaning or replacement of the filter media.

Sugar Syrup Filter Press is used for achieving clear filtration quality for high value liquids. Meeting GMP & FDA norms, these filter presses can be made available with support of different pumps like

## C.I.P

CIP clean-in-place system is widely adopted in the beverages processing equipment to use the electrical heat and the cleaning media of hot water , acid and alkaline to clean the highly sealed inner tank of the machinery and the pipe line for an effective surface cleaning to remove the deposits to keep the beverages processing equipment in the upmost condition of best performance.

## CONE BLENDER

The double cone blender is used to produce homogeneous solid-solid mixture. Mixing is a common process step in the manufacture of products for industries such as food, cosmetics, pharmaceutical, chemical, detergents, fertilizers and plastics.

Double Cone Blender is an efficient and versatile machine for mixing of dry powders and granules homogeneously. All the contact parts are made of stainless steel.

## 20 Ltr Automatic Jar Filling

Kush enterprises is an Exporter & Manufacturer of "Automatic Drinking Water 20 Liter Jar Filling Machine", "Automatic 5 Gallons Drinking Water Filling Machine", "Automatic Jar Filling Machine". Our series drinking water barreled machine integrates Bottle Washing, Water Filling and Capping into one unit in order to achieve the purpose of Washing & Sterilizing.

## PULVERIZER

Pulverizer are designed to provide high-speed fine crushing to make products with uniform grain size at an extremely large capacity. Automization is attained by swing hammers attached to a rotating disk which rapidly rotate at a distance of one mm inside a fixed lining plate to cause impact, grinding. Kush Enterprises is engaged in delivering in offering Industrial Pulverizer.

## FRUIT MILL CRUSHER

The fruit mill is utilized to crush any fruit & vegetable, before putting the same into Pulper or hydraulic press to extract juice. This ensures more recovery of juice and less load on machine extracting juice. This also saves time comparing to extracting juice out of fruit & vegetable when directly fed into Pulper or hydraulic press or any other equipment to extract juice.

## COOKING KETTLES

Jacketed Kettle Gear Tilting Type is the ideal equipment for cooking and boiling food materials. All the parts that touch the food material are made of high-quality Stainless Steel..

We are .Manufacturer of Steam Jacketed Kettle fixed type- Stainless Steel Steam Jacketed Kettle,Tilting Type Tomato Ketchup Machine, Industrial Steam Jacketed Kettles with & without stirrer.

## BATCH MIXER

Capable of blending together all of your dry/wet products, the dry mixer offers a unique spiral action ensure complete mixing and heavy discharging doors for easy unloading.

## PULPER

Fruit pulper with motor is used to extract pulp from fruits, vegetables and other pulpy items. During the operation, the seeds and skin get separated and discharges through a chute. It is commonly used in canning industry and ayurvedic medicine manufacturing units.

The fruits and vegetables are fed in the pulping chamber where due to blades and brushes the fruit is pressed against the sieve.

## VEGETABLE CUTTING MACHINE

we offer multi function vegetable cutting machine (table top), pickle cutting machine, vegetable cube cutting and dicing machine, root vegetables shredding machine, tutti frutti cube cutting machine / tutti frutti cutting machine and ginger slicer/turmeric slicer/onion slicer/potato slicer/vegetable slicer from India.

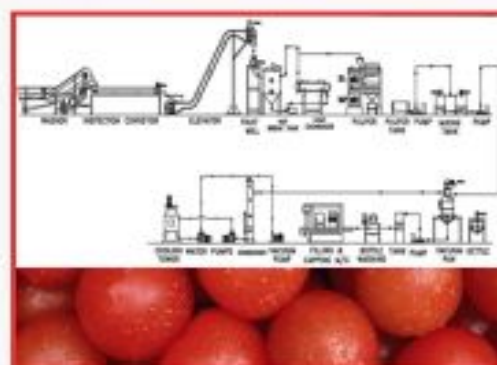

## TURMERIC PROCESSING

We are one of the leading manufacturers of Turmeric Processing Plant. We provide end to end solution for Turmeric / Haldi processing from Raw Turmeric (Root) to Curcumin Extraction of various capacities on Turnkey basis to meet the international standards. The Turmeric processing line includes Boiling / Cooking, Drying, Polishing, Grinding and packaging also provide complete solution for Curcumin Extraction from Turmeric by way of Solvent Extraction

## TOMATO PROCESSING PLANT

Tomatoes are usually processed for paste and the processing line mainly includes five parts: fresh tomato receiving, pre-washing and sorting section; extracting section; concentrating section; pasteurizing or sterilizing section; aseptic filling section. It is mainly composed of discharge system, hydraulic convey system, bucket elevating, washing and sorting system, crushing system

## GINGER PROCESSING LINE

We supplied ginger & turmeric processing equipments such as Ginger Washer, Conveyor, Slicing, Extraction/ Crushing, Pasteurization, Drying, Filling & Packaging. Ginger processing line starts from 100 Kg/Hr to 15 ton/hour with different level of automation and different feeding systems of Ginger. Can be used to make as Ginger Paste, Ginger Powder, Ginger Flakes etc.

## FRUIT JUICE AND BEVERAGE LINE

We cover any number of fruits like grape, pineapple, pomegranate, mango and other stone fruits and tropical fruits processing to produce fresh cloudy or clean juice, juice concentrate and puree. From preparation to preservation, conveying and packaging, our comprehensive range of technologies captures the freshness taste, texture, appearance and nutrition of fresh fruit and vegetable products.

## TOP & BOTTOM WASHER

The machine is made of stainless steel mesh conveyor, with high-pressure water spray on top and bottom under the conveyor, in order to wash and clean the whole piece of vegetable/fruit surface completely, without any damage.

## ROTARY/DRUM WASHER

With a rotary drum washer, parts are fed into a rotating drum continuously or in batches. This drum looks like a long, horizontal cylinder. The drum's internal helix causes parts to move through it as it rotates. During washing and rinsing stages, parts are gently tumbled to expose all surfaces and edges to the aqueous solution.

## FRUITS AND VEGETABLE

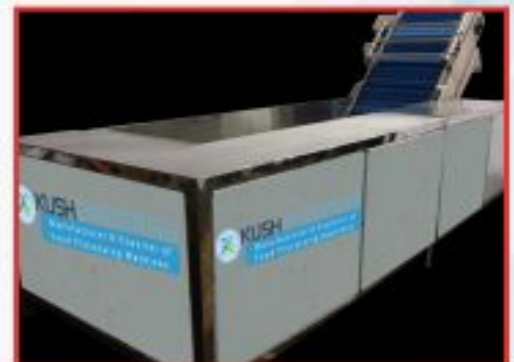

Food grading involves the inspection, assessment and sorting of various foods regarding quality, freshness, legal conformity and market value. Machinery is also used to grade foods, and may involve sorting products by size, shape and quality.

Grading of fruits and vegetables based on physical characteristics like weight,

## Leafy Vegetable Washer

The washer is fitted with a take-off conveyor made of modular belt. The product is dumped into the washer tank where an air blower attached to the unit will agitate it and subsequently washed by strong water spray. The product is pushed forward due to water pressure and reaches the take-off conveyor. On the take-off conveyor another spray of fresh water will be provided.

## INSPECTION CONVEYOR

Inspection conveyors can help test various kinds of product attributes on the line to ensure that product is the highest quality before it moves to the packaging phase.

A belt conveyor is a system designed to transport or move physical items like materials, goods, even people from one point to another. Unlike other conveying means that employ chains, spirals,

## ELEVATOR

The Vegetable Elevator, also known as a Vegetable Conveyor, is a pivotal equipment in the food processing industry. This machine is designed to transport vegetables from one processing stage to the next, reducing manual labor and increasing overall productivity.

## VERTICAL FILM SEALING MACHINE

This series sealer has the function of continuous carry, sealing in operation and able to be horizontally, vertically and with stand, the machine adopts electronic constant temperatures mechanism and steeples speed adjusting transmission mechanism, it can seal plastic films of Various Materials

## VACUUM PACKING MACHINE

This series of vacuum packaging machine is featured by automatic processing of vacuum, sealing, cooling, which is used in vacuum packaging of the food, pharmaceutical, aquatic, chemical and electronic industries. It can prevent the product from Oxidization and mildew, as well as corrosion and moisture keeping the quality and freshness and prolonging the storage time

## TIMER FILLER MACHINE

The Semi-Automatic Timer Filling Machine consists of the main structure of SS, product holders, 100 liters tank with a stirrer, level controller, filling pump, filling nozzle, auto & manual mode, pedal switch & AC drive.

## THERMAL SHRINK PACKAGING

Thermal Shrink Packaging Machine

KE-AB 100 thermal shrink packaging machine is suitable for shrink films such as POV, PVC, PP, POF, etc. There are shrinking tubes on the top, bottom and sides of the shrinking room. The temperature of the shrink room and the speed of the conveyor are adjustable. And the size of the machine can be customized.

Features:

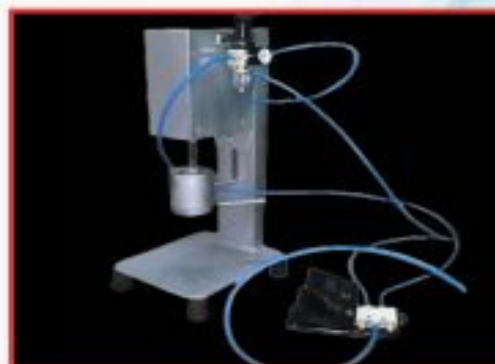

## SINGLE HEAD PNEUMATIC FILLER

Single-head Pneumatic Filling Machine was improved and created on the basis of the advanced filling machine technology. The structure of liquid filling machine is more simple and reasonable with high accuracy, and convenient operation .Application: Suitable for medicine,daily life products, food and special industries.

## PNEUMATIC LUGCAP SEALING

lug cap sealing machine suitable for bottle capping with lug caps. Pneumatically operated and more efficient as well as faster.
