

Kitchenovo™

MODERN. SMART. VERSATILE.

JUST LIKE YOU!

Crafted With

Love

India's largest manufacturers of high quality stainless steel products

Suncity Sheets is a premier manufacturer of brilliantly engineered steel products, that are known for their robust built, durability & quality across the world. For over 25 years, we have consistently escalated in the ranks of the market as the

preferred partner for a multitude of industries like Furniture, Kitchenware, Automobile & Ancillaries, Heat Exchanger and Fabrication, Textile and Food Industry, Railways, Industrial Engineering, and Oil and Gas.

Innovation that works for you

Kitchenovo is a company committed to transforming the contemporary Indian kitchen with cookware that's crafted with love.

Our goal is to design and manufacture cookware that stands for innovation, aesthetics and meticulous workmanship. From the creative designs and functional size options to the durable materials and fine finish - every Kitchenovo product is a statement of impeccable class and quality.

High-grade metal for high-grade cookware

Kitchenovo cookware is professionally manufactured using heavy gauge stainless steel and strengthened with a unique, long-lasting triply steel impact-forged bottom. Our cookware comes with an elegant SS mirror finish which makes it sleek and attractive - to cook-n-serve or to gift!

Stainless steel is a blend of iron, carbon and chromium which makes the metal 'stain less', resistant to rust & corrosion, and easy to clean. Nickel is also added to increase the steel's strength and weldability.

Impact-forging for strength & durability

The beauty and benefits of Kitchenovo cookware literally start from the bottom up. Kitchenovo cookware comes with a unique impact-forged bottom which ensures faster, uniform cooking. Three metallic layers – two stainless steel with one aluminium sandwiched in between – are bonded by impact forging using 2500 ton force.

The soul of your kitchen

Whether your customer is health conscious, looking for the best in cookware, juggling a busy family or aspiring to be a chef at home, we have a range that's a perfect solution for every need.

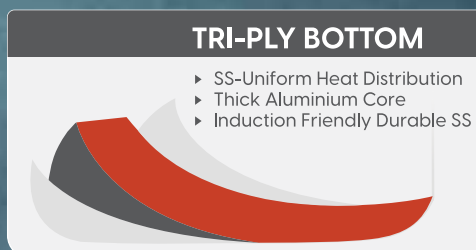

NOVO

Explore the exciting range of stainless steel cookware with stay cool bakelite handles which are ergonomically shaped for comfortable feel and ease of usage. The cookware is manufactured with stainless steel material of high quality standards, thus the material quality and construction is of international level.

The impact bonding of 4mm thick aluminium disc with 0.4mm external cowl provides a uniform heating base, which is essential for any good quality cookware.

CROMA

PRISTINE

CUISINO

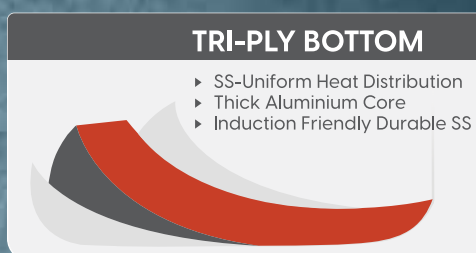

CROMA

Croma series comes with high quality stainless steel tubular handles. Tubular handles commonly have holes at the end for receiving hooks or pegs for vertically hanging in a kitchen. These handles are preferred for their lighter weight, as well as lower conductivity of heat, as compared to solid metal handles. As these handles also dissipates heat, they provide the user with greater latitude to directly grasp the handle when cookware is used on a stove top for a generally reasonable period of time. Tubular handle can also be relatively large for easy and secure gripping, but remain light in weight so the pan is not tipped over.

Features:

- supreme finish
- strong construction
- comfortable gripping
- easy for hanging on hooks

CROMA

PRISTINE

CUISINO

PRISTINE

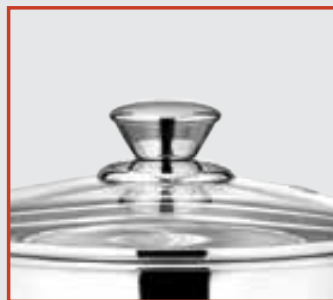

Our Pristine series offers high quality stainless steel investment casted handles. Stainless steel investment casting is able to cast stainless steel parts with intricate shapes, good size accuracy and smooth surface finish. This type of manufacturing process can produce small to medium stainless steel components. According to the structure and dimensions of stainless steel cookware handles, all types can be investment cast with high quality. With stainless steel casting, less defects occur, and it suits both small and large size pots & pans. In other words, if you want to get a high quality cookware handle, stainless steel casting is the most ideal. It is also important to note that pots and pans with high-quality handles are dishwasher safe and can even be sanitized at high temperatures for optimal cleaning.

CUISINNO

Cuisino is Kitchenovo's special range of heavy-duty, professional cookware for hotels, restaurants and food-service establishments. Premium stainless steel reduces food adhesion and staining, protecting the culinary creations. The high-strength impact-bonded base heats food evenly, quickly and efficiently. Sturdy, stay-cool handles make handling easier, while strong rivets and robust construction ensure durability and long life in rough commercial kitchens. No wonder professional chefs trust Cuisino to enjoy higher productivity, substantial energy savings and safer cooking in their kitchens!

NON-STICK COOKWARE

COATING THAT TOUCH THE SENSES

Thanks to the wide range of decorative coating which offers new options in cookware in terms of functionality and looks.

Kitchenovo cookware range is now available in both non-stick and decorative coatings with excellent functionality and durability.

Kitchenovo has associated with Weilburger of Germany to provide the technology and material support to get world class coatings onto our cookware. The coating is available under the brand name - GREBLON from Weilburger and is marketed globally.

Today GREBLON is a global brand name where use, function, durability and surface design are of great importance.

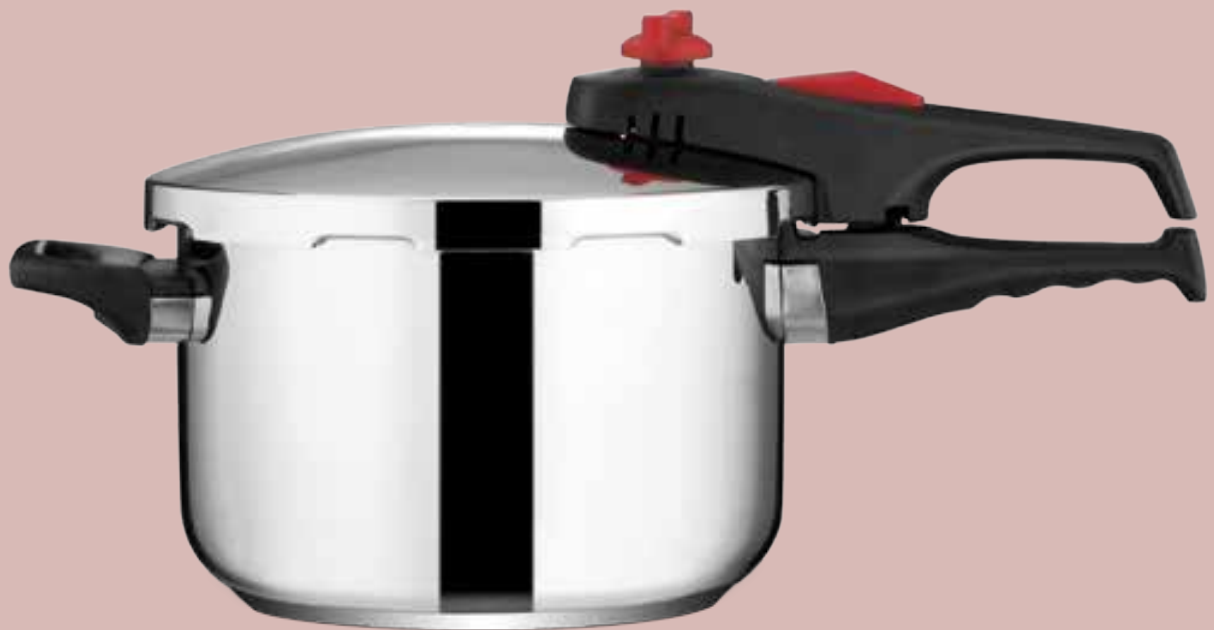

Advantages of GREBLON Coatings -

- Appealing surface in many different colours.
- High level of hardness and scratch and abrasion resistance.
- Excellent non-stick effect and easy to clean.
- Very good temperature resistance.
- High level of stain resistance.
- Safe to be in contact with food.
