# About us

Lead Reclaim & Rubber Products Ltd. (LRRPL), a distinguished name in the rubber industry, headquartered in Ahmedabad, Gujarat. Established in 2012 and proudly listed on NSE Emerge, our company has carved out a significant presence in the market by specializing in the production of premium reclaim rubber products. Our range includes top-grade tyre reclaim rubber, Butyl reclaim rubber granules, and crumb rubber powder, all meticulously crafted from recycled scrap rubber.

At LRRPL, our commitment extends beyond merely producing high-quality rubber products. We are dedicated to advancing sustainability through the repurposing of scrap rubber, which plays a crucial role in reducing environmental impact. By transforming waste into valuable resources, we not only help in minimizing the ecological footprint but also contribute to a more sustainable future for our planet.

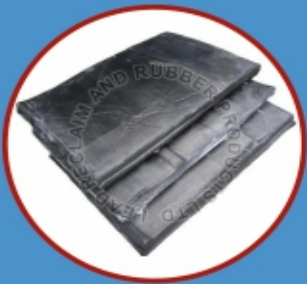

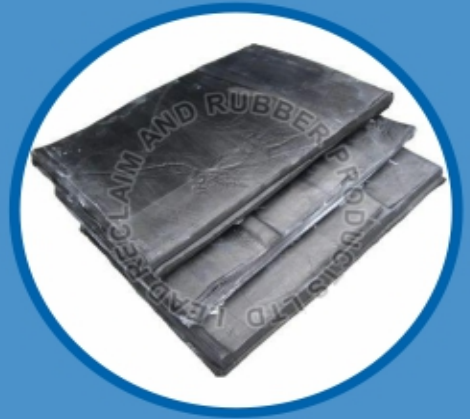

Our mission is clear: to offer recyclable, economically viable, and superior-quality reclaim rubber to our clients while continuously modernizing our production facilities. We invest in cutting-edge technology and sustainable practices to mitigate environmental risks, ensuring that our operations align with our ecological values. This relentless drive for excellence is complemented by our vision to become a leader in the industry. We aspire to set new standards in the production of reclaimed rubber by emphasizing cost-effectiveness, quality, and sustainability.

Our core philosophy revolves around the idea of giving new life to discarded rubber. We view waste as a valuable resource and strive to transform it into high-performing materials that meet, and often exceed, industry expectations. This transformative approach not only enhances the quality of our products but also reinforces our dedication to environmental stewardship.
