+91-9911399006,  
+91-9810907051

Established in the year 2007, HMB Engineering is the leading manufacturer and exporter of wire mesh screens. Our entire product line comprises of Vibrating Screen, Stainless Steel Decorative Wire Mesh, Conveyor Belt, Perforated Sheet, Crimped Wire Mesh, Demister Pad, Welded Wire Mesh, Stainless Steel Wire Mesh, Rubber Beading, High Carbon Steel Wire Mesh and Fencing Products. Our constant source of inspiration is our mentor, Mr. Amit Minni, under whose guidance, we are remarkably growing in the market. Our clients across the global market prefer our range of products for their dimensional preciseness, economical prices, adaptability to work under all conditions and durability. It's been 8 years since we are into this domain, regularly improvising and upgrading the products as per the current demands from the industry.

We have a wide stock of products available in different construction materials, dimensions, mesh openings, weaving patterns and other specifications that can well furnish the requirements of various industries like Aeronautics, Cement, Construction, and Ceramic, Coal, Minerals, Agriculture, Mining, Rice Mills, Petrochemicals, Glass and many others. For this, we have established 400 square feet of infrastructure Noida, Uttar Pradesh where all the procedures like procurement, manufacturing, testing and packaging is carried out. We assure our clients for the supreme quality of products as we manufacture them in accordance with international quality standards.

Quality is the prime focus for us right from our inception in this industry. Hence, we make sure to test the entire product line on stringent parameters of designing, adaptability to different conditions and durability. Strict quality testing is done by our experts on each and every process of production to leave no room for defect at the end.

## Infrastructure

Since 2007, we have been actively working in this industry, manufacturing bulk quantity of wide range of wire mesh screens, fencing wires, conveyor belts and vibration screens. Our infrastructure is widely spread across an area of 400 square foot, fully fledged with all the advanced in- house facilities.

For better management, the entire infrastructure is wisely segmented into different units of research & development, designing, procurement, manufacturing, testing, packaging and marketing. All the departments are headed by professionals who have years of experience in his respective domain. All these years, we have been successful in installing all the latest techniques and technologies required for manufacturing high grade products that ensure superior performance.

## Quality Assurance

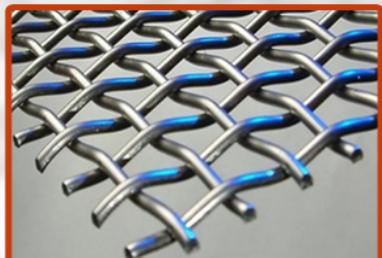

Right from our stepping stone in this industry, we have been practicing quality centric policies in our business approach. We believe in maintaining high standards of quality in the production line, no matter what the situation is. In order to achieve this, we keep a strict eye on the quality right from the starting till the end, procurement of materials, designing, manufacturing and packaging.

Unique set of parameters are set for a specific production process. We have appointed highly experienced senior professionals for conducting stringent testing on the raw materials and products in order to ensure finest quality at the end.
