VR HEALTH SCIENCE

“We Redefine Beauty.....Redefine

Our story began in 2015 with a humble beginning but with a strong desire to enrich the beauty of people naturally that god has created.

Our Mission :To build the confidence of each persona by nurturing and enhancing their individual Beauty.

VRH the brain child of Mr.Vishal Sehgal, who with his vision to create new entities for Skin and Hair Care different from others, laid the foundation of VRH.

With the belief in the science of body Aesthetics to be related to Naturo Mythological Ideology, We have developed unique products which deliver guaranteed results.

VRH has grow leaps and bounds over the years as its innovative formulations have been endorsed and testified by not only the Dematological Medical fraternity but also the end user.

The ever increasing knowledge and awareness of the consumer encourages us to deliver latest cutting edge technology and formulations best suited to their needs.

“HERBOCELL”

The Wonder Formulation

UNIQUE RESEARCH OF VR HEALTH SCIENCE

Prepared from various herbs through rigorous process of fermentation to
MICRO ORGANISMS & distillation.

After distillation fungal yeast is added to potentiate free fatty acid values and
finally Synthesis of Growth Factor which stimulates **mRNA** expression.

This ultimately enabled reversal of **TELOGEN to ANAGEN**.

Hence a time release mechanism of delivering **PROTEINS, VITAMINS,
MINERALS & CALCIUM** which cleanses DHT was evolved.

To enhance the overall potency of the formulation **NANO COPPER** of 240ppm-
developed through electrolytic process is added

Thus the birth of “HERBOCELL”

Research by :-

Mr. Vishal Sehgal

Vitonomics Vitamin C Serum 25 is bio-engineered cellular composition that stores a network of super anti-oxidants in the cell membrane and facilitates the transport of these free-radical quenchers deep into the bio-layer membrane of the skin cells. It stimulates the synthesis of collagen in the skin to give tight & firm feel. This complex is clinically proven to facilitate the regeneration of skin cells and reduce visible signs of ageing.
