Year of  
Establishment  
**2022**

Shield Flex is among the largest manufacturing and supplying companies, established in 2022 to focus on a wide range of electrical products. Based out of Delhi, the company avails quality solutions for various requirements that have to do with electrical and solar energies, including but not limited to flexible cables, flat cables, multi-strand wires, LED street lights, and many others.

## Flexible Cables

The flexible cables provided by the company include 23 & 76 copper flexible cables, 2.5sqmm 2-core and 4-core flexible cables, and 1.5sqmm 6 core flexible cables. These cables are manufactured for reliable electrical connections; they serve quite a range of applications.

## Flat Cables and Multi-Strand Wires

Other products by Shield Flex are flat cables such as twin flat cables and submersible flat cables, and multi-strand wires in colours like black, yellow, and blue. These are highly important in an efficient and safe electrical installation.

## LED Street Lights and Armoured Cables

The company's LED street lights range from 100 W to 25 W solar options, availing energy-efficient lighting solutions. Further, the armoured cables and telephone cables address several needs in both industrial and residential areas for durability and performance.

## Quality Commitment

The belief in quality products industrially by Shield Flex innovation and customer satisfaction make them a trustworthy partner within the solar and electrical industries.
