

Mehul's 'HIGH FLOW' is a speciality chemical used as a FILTER AID in the process of Industrial Filtration. It consists mainly of Silica (SiO_2) which is inert, Odourless & Tasteless.

Instead of passing the un-filtered liquid directly through filter septum it is passed through a layer or cake made out of Mehul's " High Flow" This cake or layer is extremely porous and it will trap the impurities (solids) even of sub-micron size. Hence, the flow rates will be high and clarity of Filtrate also will increase.

Manufacturer,
Supplier, Exporter,
Distributor & Importer

Mehul Filter Aid, your premier destination for a wide range of FILTER AIDS AND chemical products. Founded in 2004 by Mr. Mehul Mehta, we are leading manufacturers and exporters of MEHUL'S HIGH FLOW a filter aid powder aiding in the filtration process to remove impurities and achieve desired levels of purity in liquids, oils, lubricants, breweries, pharma and chemical industry.

At Mehul Filter Aid, our mission is to provide high-quality FILTER AID POWDERS, DIATOMITE FILTER AID POWDERS, HYFLO SUPERCEL are all solutions to meet the diverse filtration needs of our customers. We can also provide DICALITE SPEED PLUS and various different grades of DICALITE used for many other different applications. We strive to be a trusted partner, offering reliable products and exceptional service that exceed expectations. Our commitment to excellence drives everything we do, ensuring that our clients receive the best possible value and support.

At Mehul's Filter Aid our vision is to be a leading Manufacturer, Supplier, Exporter, Distributor & Importer in the chemical industry, known for our innovation, reliability, and integrity. We aim to continually expand our product offerings and distribution channels, staying ahead of market trends and evolving customer demands. By fostering long-term relationships and fostering a culture of continuous improvement, we aim to sustainably grow our business while contributing positively to the communities we serve.

At the heart of Mehul Filter Aid are our core values: quality, integrity, and customer satisfaction. We are dedicated to upholding the highest standards of product quality and safety, adhering to strict regulatory guidelines and industry best practices. Integrity is the foundation of our business, guiding our decisions and actions with honesty, transparency, and respect. We prioritize customer satisfaction above all else, striving to understand and exceed our customers' expectations at every opportunity.

Nature of Business

Manufacturer, Supplier, Exporter, Distributor & Importer

Number of Employees

20 to 50 Numbers of people

Year of Establishment

2004

Market Covered

Worldwide

Name of CEO

Mr. Mehul Mehta

GST No

27ECDPS9959H1ZQ

Annual Turnover

Rs. 5 to 25 Crore Approx.

Legal Status of Firm

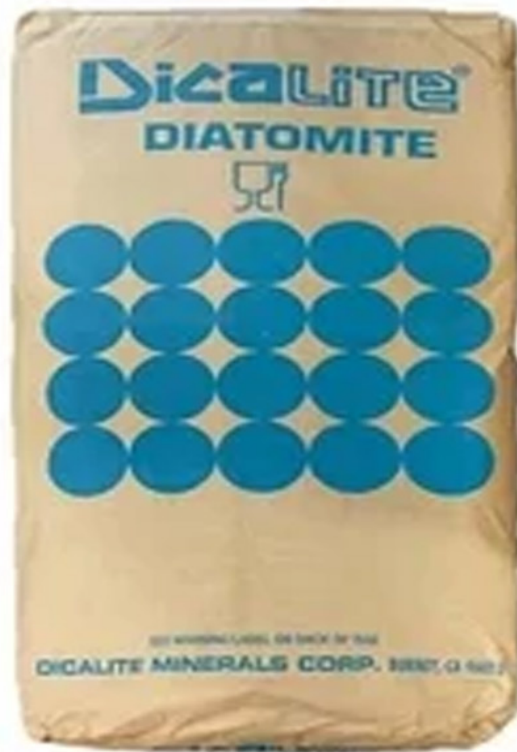

Individual (Sole proprietorship)

High Flow Filter Aid Powder

Due to its unique properties, such as low weight, resistance to high temperatures and the ability to retain water, chemically inert and neutral nature perlite is used in many branches of the economy. The basic applications of perlite are

- ✓ Construction, where it is an insulator
- ✓ Agriculture and Horticulture
- ✓ Filtration in Industries
- ✓ Abrasive in cosmetics and toothpaste.
- ✓ Absorbs oil spills.
- ✓ Aids in soil remediation.

Dicalite Diatomite Filter Aid Powder

DICALITE - Diatomaceous Earth for food and Beverage Filtration

Diatomaceous earth has been used for decades as a filter aid and has been proven to be a safe way to remove contaminants from food and beverages. It is used to filter many consumable items you may use on a daily basis like oils, fruit juices, syrup, sugar, honey, wine, beer and more. Most bottled beer and wine have been filtered at some stage with diatomaceous earth to remove solids and other contaminants.

Diatomaceous earth is approved by several government agencies as a food and beverage processing aid.

Applications of Dicalite powder in various industries

FOOD PRODUCTION

Sweeteners, Oils (Soya, Corn, Palm oils and animal fats), Syrups, Honey, Gelatin

BEVERAGE FILTRATION

Juice, Beers, Wines

ENZYMES

purifying and filtering enzymes

SUGAR INDUSTRY

Sugarcane Filtration to produce Sugar

PHARMACEUTICALS

Enzymes, Antibiotics, Epsom Salt

COSMETICS INDUSTRY

Gentle exfoliating properties and absorbent qualities

MANUFACTURING OF API'S

Filtration aid, effectively removing impurities

INDUSTRIAL

Biodiesel/Motor Oil Processing, Sizings, Oil and Solvent recovery, Greases, Waste Oils

CHEMICALS

Inorganic and Organic Chemicals, resins, Polymers, Brine, Adhesives, Fertilizers, Waste Disposal

ENVIRONMENTAL

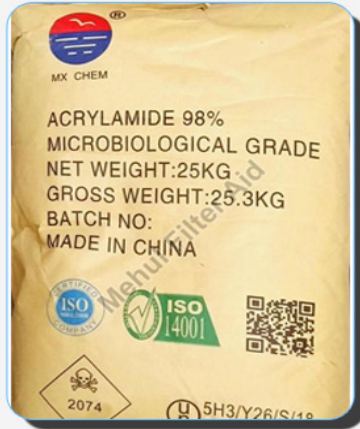

Stormwater and Wastewater Filtration, Ecology embankments, Media filter Drains

SWIMMING POOLS

Filters pool waters

50kg Sodium Nitrate Powder

Acrylamide Powder

Ammonium Bicarbonate Powder

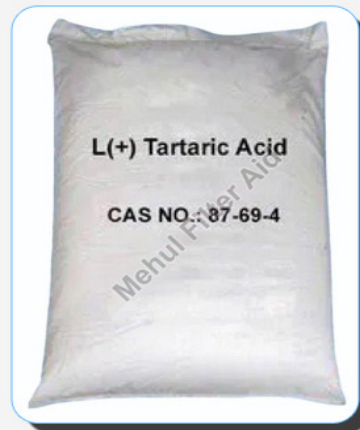

Citric Acid Anhydrous Powder

Citric Acid Monohydrate Powder

DL Tartaric Acid Powder

L Plus Tartaric Acid Powder

Malic Acid Powder

Melamine Powder

Paraformaldehyde 91% Powder

Paraformaldehyde 96% Powder

Powder Tonsil Optimum

Sodium Bicarbonate Powder

Sodium Nitrite Powder

Liquid Acetic Acid

Liquid Dimethylacetamide

Liquid Dimethylamine Chemical

Liquid Dimethylformamide

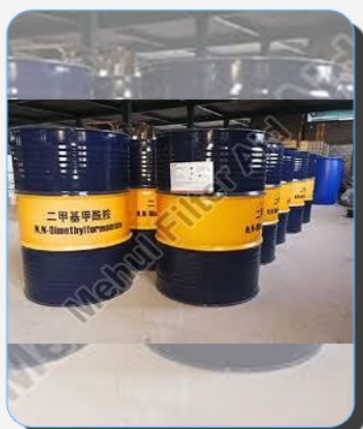

Liquid Ethyl Acetate

Liquid Formic Acid 85%

Liquid Monomethylamine 40%

Liquid NN Dimethyl Formamide

Liquid Propylene Glycol

Liquid Trimethylamine
