

ABOUT US

Since 2006, FABTECH PHARMA specializes in the design, engineering and manufacturing of today's most Innovative and reliable process machineries and is serving to core industries like the **Chemical, Food, Herbal, Ayurvedic, Dairy, Cosmetic Industries & PHARMA Plants both APIs & Formulation & allied industries.**

FABTECH PHARMA is having an expertise in its field. FABTECH's quality system is dedicated to unsurpassed quality, customer satisfaction and continual Improvement.

FABTECH's main objective is to introduce new and novel engineering techniques in the field of manufacturing cGEMP & cGMP equipments to today's PHARMA Industries requirement meeting to their quality norms.

FABTECH designs, manufactures and markets automated PLC based and Non-PLC based, FLP & Non-FLP equipments for the processing pharmaceutical formulations and APIs. Advanced engineering, modernizing designed and best quality products with the competitive price are the key and vital features of the FABTECH. Products.

Due to traditionally acquired skills of fabrication, hard work, good workmanship and fast deliveries, the company got well-established amongst the pharmaceutical and food industry machinery manufacturers. Soon the range of products manufactured also increased but due to lack of organized sales and marketing set-up, most of the sale was routed through established manufacturers and marketers in the first decade of production. In the Indian market, the firm was able to establish steady and loyal client base but major sale was still through third parties.
