With a deep commitment to empowering farmers worldwide, we offer the knowledge and resources necessary to achieve success in Agarwood production.

# About Us

**Golden Sheaf Industries Pvt. Ltd.** (GSI) is a leading Indian company dedicated to cultivating Agarwood organically and promoting its significance on a global scale. With a deep commitment to empowering farmers worldwide, we offer the knowledge and resources necessary to achieve success in Agarwood production. Our extensive experience translates into years of expertise in organic inoculation techniques, guaranteeing a fruitful harvest within just six months. This expertise is further bolstered by our own Agarwood plantations strategically located across Nagaland. Interestingly, our base farm in Akuhaiqa village, Wokha district, doubles as an Agarwood Tourist Village, offering a unique glimpse into the world of Agarwood cultivation.

Our unwavering dedication to Agarwood extends beyond cultivation. We actively promote its cultivation by providing high-quality seedlings of *Acquilaria Malaccensis*, the primary source of this precious resinous wood. Understanding that ecological suitability is paramount for a thriving Agarwood plantation, our team of technical experts meticulously assesses potential plantation sites. This assessment considers various crucial factors like soil conditions, water availability, drainage systems, and existing plant life. Nagaland Agarwood is chosen as the most trusted and preferred brand for promoting local indigenous agarwood products by Nagaland Agarwood Farmers Association (NAFA) till now.

Recognizing the importance of providing our clients with peace of mind, we offer optional buy-back agreements. Through these agreements, you are guaranteed a market for your Agarwood trees at harvest, with prices determined by the prevailing market rates. Should you prefer to explore overseas markets, we can leverage our established network to assist you in finding international buyers for your harvest.

At Golden Sheaf Industries, we believe in fostering a collaborative approach to Agarwood cultivation. We are committed to providing you with the knowledge, resources, and unwavering support you need to cultivate high-quality Agarwood. Furthermore, we prioritize environmentally responsible practices, ensuring the sustainability of this valuable resource for generations to come.
