

Mayra Industrial Pvt. Ltd

2019

MAYRA INDUSTRIAL PVT. LTD stands as a beacon of innovation and sustainability in the realm of plastic recycling. Established in 2019 by the visionary Mr. Sandeep Dahiya, our journey began with a steadfast commitment to transform the landscape of waste management, particularly in the domain of plastic bottles.

ABOUT US

MAYRA INDUSTRIAL PVT. LTD stands as a beacon of innovation and sustainability in the realm of plastic recycling. Established in 2019 by the visionary Mr. Sandeep Dahiya, our journey began with a steadfast commitment to transform the landscape of waste management, particularly in the domain of plastic bottles.

Situated in Sonipat, Haryana, our roots run deep within the community we serve. With a strategic location that enables seamless operations and accessibility, we take pride in our role as a local pioneer in the recycling industry.

At Mayra Industrial Pvt. Ltd, we specialize in the sourcing, trading, and supply of various grades of plastic bottle scrap. Our diverse product range includes Plastic Bottles Scrap, Mixed Crushed Pet Bottle Scrap, and Pet Bottle Grinding Scrap. These materials serve as the cornerstone of our efforts to promote a circular economy, where waste is not merely disposed of but repurposed into valuable resources.

What sets us apart is our unwavering dedication to quality and integrity. We adhere to stringent standards throughout our processes, ensuring that every batch of scrap material meets the highest specifications. By upholding these standards, we not only deliver value to our clients but also contribute to the larger goal of environmental sustainability.

Central to our ethos is the belief that innovation holds the key to addressing complex challenges. In line with this philosophy, we continually invest in research and development, exploring cutting-edge technologies and methodologies to enhance our efficiency and effectiveness.

However, our journey extends beyond business metrics; it is a testament to our broader commitment to social responsibility. We actively engage with local communities, fostering awareness about the importance of waste management and promoting responsible consumption practices.
