M. A. METAL CORPORATION

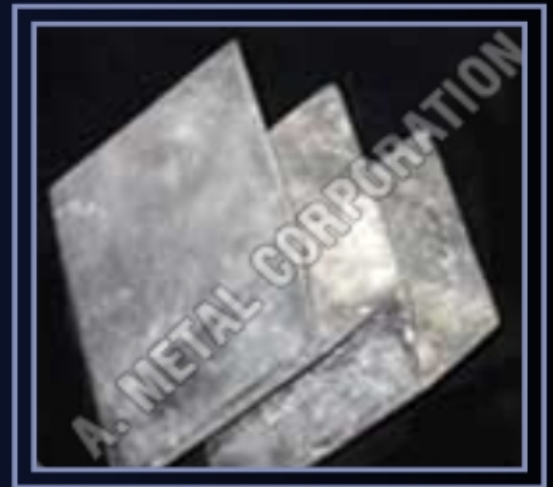

M. A. Metal Corporation was established in 1971 under the able leadership of our CEO Mr. Adnan M. Tambawala (Partner). Since its commencement, the company has progressed in leaps and bounds. We are specialized into the manufacturing of solder foil, lead sheet, lead wool & lead shots (Granules). We as the manufacturers and exporters; extensively deal in lead metal sheet that is the best metal sheet on the market. As the lead shot manufacturers we have been able to promote ourselves as dominant market players.

We have an excellent infrastructural set-up keeping the latest technological innovations in mind. Our raw materials are sourced from the elite mining industries to avoid sub-standard matters. We have a core group of deft professional working force with a sole motive to promote quality control. Our business has a healthy association with the merchandising community globally. All major industries, having lead metals, lead bricks etc. as their basic components, have a strong business bonding with us. We look forward to extend our hands to those who are willing to avail our quality services.

OUR PRODUCTS

Lead Bricks

Our first rate products Lead Bricks are produced from a good quality lead alloy which provide solidity and authenticity to them. They are available in different shape and size to be fit for various usages. Rectangular lead bricks and standard lead bricks are offered in standard texture and are of excellent class. They are used in medical equipments, X-ray shielding companies and numbers of different companies. We are also one of the best lead bricks manufacturers in India with the focus on customer's satisfaction. These products are not only available in abundance but are also delivered to the customers end with an ease.

Lead Shot

Our manufacturer and export unit generate lead shots that are use in various industries. The standard Lead Shot are Lead granules used in a various industrial circles. They are chiefly used in weight balancing in different industries. Another category of Lead shots which are offered from our side is lead metal shot which is very smooth and is produced from the best raw Lead accessible. These granules have wide application in different fields such as Radiation Department, Medical equipments companies etc. We are also the foremost lead shot manufacturer in India having a big clientele all around. We are also a well established name in lead shot exporter in India.

OUR PRODUCTS

Lead Wool

The Lead Wool is available with us is of excellent merits. You can purchase it in a very affordable price and that also without actually compromising with its fine traits. Our lead metal wool which is very fine and slender has manifold implication in industries. It is exclusively used in industries like medical equipments, insulation etc. As a paramount lead wool manufacturer we take a lot of pride to claim that we are the major players of lead wool for a long time. We are also number one lead wool suppliers from India.

Solder Foil

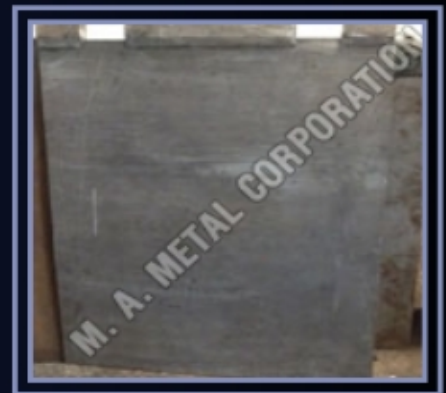

We offer a largest array of optimum quality lead foils. The Solder Foil supplied by us is made out of best raw material which is sourced from the major mining industries. They are used for the purpose of soldering metals of different kinds. The soldering foil is a soft foil which has a wide application in different fields. We are also the major producers of solder tin foil which is widely used as soldering material for tin. We are one of the leading manufacturers of solder foils the world over. The infrastructure we use for the manufacturing of these products has really helped us to offer a cost effective products without actually affecting their qualities.

OUR PRODUCTS

Lead Anode

We bring forth to customer the high on quality Lead Anode. The lead alloy anode that we manufacture is made from premium quality lead and is assured to be free of any impurities thus, assuring free flow of current. The anodes are available in different sizes as per the requirement of the customers. Moreover, the quality that these anodes are available in makes them highly sought after in the whole market. And this huge popularity has made us along with it the most famous lead metal anode manufacturers and suppliers in India.

Lead Ingot

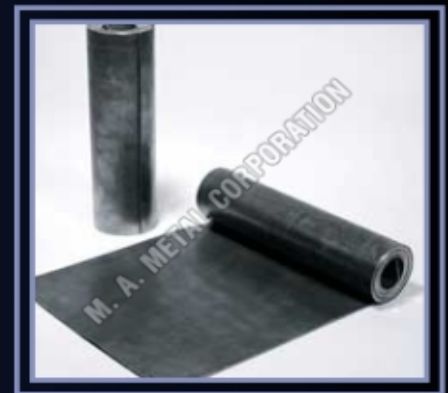

We are into the business of Lead Ingot that is simply peerless when it comes to quality. This quality has made these ingots highly popular in the market. Moreover, this has made us count amongst the most popular pure lead ingots exporters and suppliers in India. The remelted lead ingots that we supply to the customers are assured to be cent percent pure. Also, these are assured to be free of any types of impurities. These highly durable ingots maintain the set standards of the market. You can order these ingots in bulk and we assure you that they will be delivered to you within the stipulated time limit.

OUR PRODUCTS

Lead Sheet

We are known for the superior production of standard Lead Sheet. When it comes to delivering the best quality lead metal sheet we are the manufacturing unit you can always trust. These metal sheets are flexible and so can easily be converted into the desired shape making them suitable for various purposes. We are one of the best lead sheet exporters in India enjoying full trust and favor of our clients. Here is the place where customers are always assured of our unique yet genuine metal sheets.

Lead Wire

We bring forth optimum quality Lead Wire that is manufactured with precision using latest technology. These Lead Wires are highly appreciated for their superior quality and longer working life among the clients. Lead Wires are manufactured to cover a wide range of dimensions and materials to suit the industrial applications.

Used In

- Bullets
- Electric lamps
- Bridge rectifiers

USES OF PRODUCTS

Lead is more effective for sound proofing & for X-ray rooms than any other material. It is rust proof, fire proof and easy to handle. It has also high mass backing to plasterboard & plywood to overcome with these materials which would render them weak with regard to the acoustic performance. Lead sheet is the most malleable of the common metals and can easily be shaped without fracturing. We can provide deep drawn, hydro formed and metal spun parts to suit your requirements.

Lead is highly resistant to corrosion from the atmosphere, seawater and many industrial chemicals. Lead sheet is used to manufacture corrosion-resistant gaskets, soundproofing (insulation), large pipes, lead sinks and lab fixtures, and lead lined tanks for acid storage.

Lead Pipe

These lead pipes are suitable for Water, Soil Waste, Ventilating, Gas Purpose, Telephones, Telegraph, under ground works, Acids & Chemicals. They are highly corrosion resistant.

Lead Anodes

- Great for custom chrome plating
- Solid - square or round, we will manufacture it for you
- All hooks are copper since it is the best conductor
- Send us your drawings and we will produce to your specifications
- Any size any shape
- All hooks are plastic coated for protection from the solutions and handling

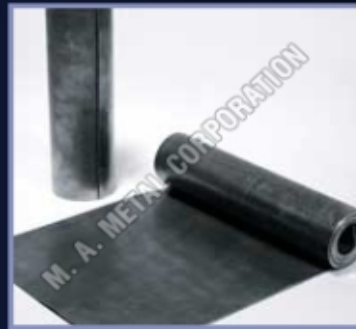

OUR PRODUCTS

Quality Policy

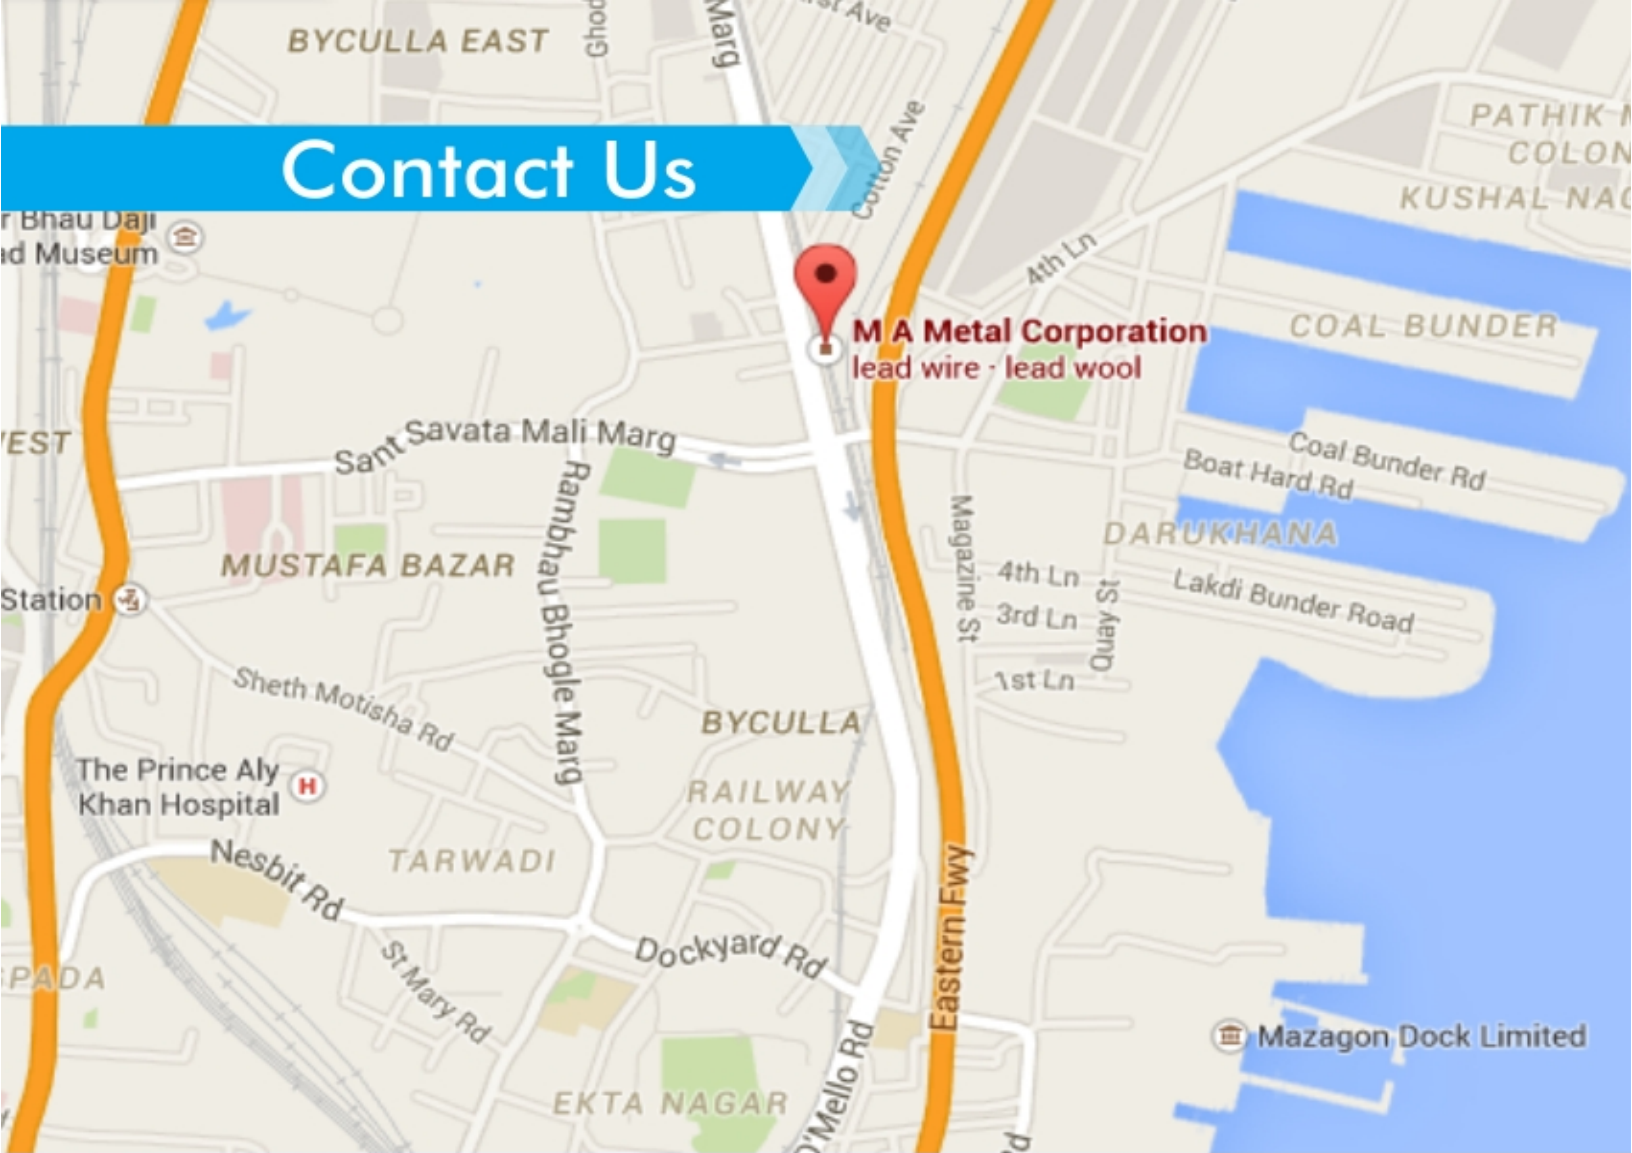

We at M. A Metal Corporation shall produce, possibly the best quality of lead & solder products in any desired shape, size and quantity that shall exceed customer expectations.

We shall aim to be the best company in manufacturing with an organization that makes things clear and does things right the first time.

To achieve this, we shall select the best raw materials; employ equally the best manufacturing process by the team work of highly experienced and educated people at every stage concerned.
