

UNIQUE EQUIPMENTS

Manufacturer And Exporter Of Metal Detector

An ISO 9001:2008 Certified Company

www.uniqueequipments.org

The foundation of Unique Equipments was laid in 1999 with a view to provide advanced Metal Detectors for the national and international market. Our endeavors are being supported by a prudent mentor, Mr. Pravin P. Parker, who is the CEO of the company. Working through a keen understanding of the ever-changing market demands and specific requirements of clients, the company has excelled in providing the right solutions for diverse applications on a consistent basis. Our popularity in the market has also soared on the basis of providing an extensive range of Metal Detectors, which is easy to install or modify as per the user's needs.

Infrastructure

Well connected by road, rail, sea and air, our production unit is located 30 Kms away from Panjim, Goa and boast of a fully operational unit spread over an area of 15,000 Sq ft and bare space of 1750 Sq ft. Equipped with latest machinery and equipment, the unit enables the production of modern Metal Detectors that meet the needs of the industry and the clientele.

Workforce

Forming the support system of the company, the workforce at UNIQUE EQUIPMENTS is responsible for not just the production but the careful development of the Metal Detectors. Our workforce is able to handle any unforeseen scenarios that may arise at the clients' end and deal efficiently with them

Our Vision

Our Vision is to become one of the best companies in India and to play an important role in bringing forth solutions that you can depend upon.

Our Products

Pulse Induction Metal Detector

Unique IMD's works on the advanced Pulse Induction principle, renowned for its ability to detect the tramp metals from the conductive ores. These Metal Detector find more useful in the place where magnetite, hematite, pyrites, wet materials are conveyed. The advantage of this Metal Detector is it gives Zero malfunctioning to vibration compare to other metal detector. The welding / walky talky effect is also nullified within 2mts range. A suitable high Sensitivity is also achieved according to the aperture size in the Pulse Induction Waterproof Metal Detector.

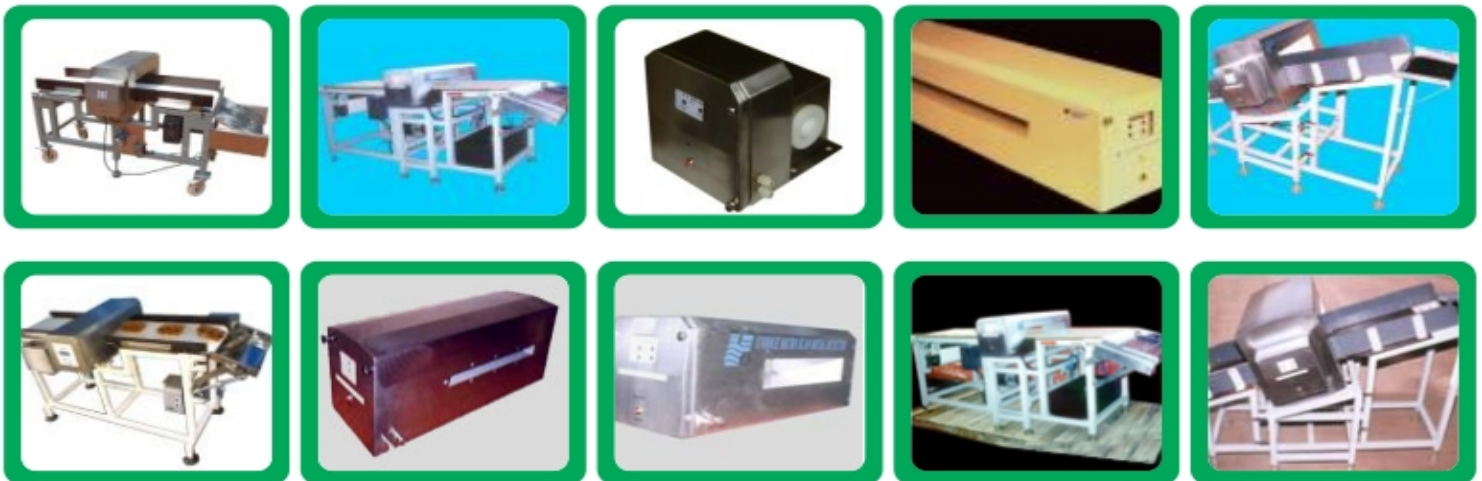

Our Products

Micro Scan Metal Detector

Metal Detectors are an important cornerstone in the quality management systems of all Food processing companies. One cannot imagine preventive quality management in any food processing industry without Metal Detector.

UNIQUE EQUIPMENTS - Goa, is the leading manufacturers of Industrial Metal Detection Equipments and offers a comprehensive range of specialized systems for industry dealing with food, chemicals, plastics and all other industry. Unique Metal Detection systems including Micro Scan Metal Detector are in daily operation in several industries where these are efficiently handling a wide and diversified variety of products. We offer an extensive range of metal detection and separation solution for every type of conveying system used in industries. If the product is being conveyed on belts of chutes, MICRO SCAN METAL DETECTOR series with separators are able to remove with pinpoint accuracy even the tiniest of metal particles from the products flow. The unit is constructed from stainless steel to meet the strict, modern hygienic standards of the food industry. Every aspect of reliability has been taken into account in the design. Wholesale Metal Detectors can be purchased from us in various specifications.

Our Products

Tablet Metal Detector

The Pharmaceutical industry needs highly accurate metal detection to meet the requirements of demanding consumers and stringent legislation. Unique Pharma Metal Detector provides class leading, online metal detection. The unit is manufactured from stainless steel through out to provide a hygienic easily cleaned inspection. A robust stainless steel reject flap is operated by a high speed electrical solenoid for clean, precise rejection of contaminated product with minimum waste. This metal detector chute can be quickly and easily dismantled for routine cleaning and product changeover. It is especially well suited for high processing speeds and quick product change. This latest Tablet Metal Detector model also incorporates the patented and well-proven Audit Check self-monitoring system. The Unique Pharma Tablet Metal Detector is designed for simple adaptation and flexible, efficient operation on the line. The complete unit takes up minimum system length and can be located before or after the de duster.

Our Products

Hand Held Metal Detector

Unique Handheld Metal Detector is able to detect minute quantities of gold, silver and all other metals effectively. This is because; all the Hand Held Metal Detector models are highly sensitive. The body of this metal detector is of PVC mould to give high strength and sturdiness and is light in weight.

Under Vehicle Search Mirror

We have achieved excellence in production of Under Vehicle Search Mirror. It is available in different varieties with us to fulfill your varied needs. We are one of the famous manufacturer and exporter of Under Vehicle Search Mirror. New materials and technical innovations from over years of experience have resulted in this advanced Under Vehicle Search Mirror. Furthermore we offer most competitive prices for excellent quality products. Thus, we are positioned amidst the most prominent Under Vehicle Search Mirror Manufacturers, Exporters from India.

Our Products

Deep Search Metal Detector

When efficiency and long term durability are blended in optimum way, our superior quality Deep Search Metal Detector is born. Undoubtedly we are among the best Deep Search Metal Detector Manufacturer and exporters. We provide complete line of highly powerful and efficient Security Deep Search Metal Detector. So feel free to shop now and sign the best deal possible with us.

Door Frame Metal Detector

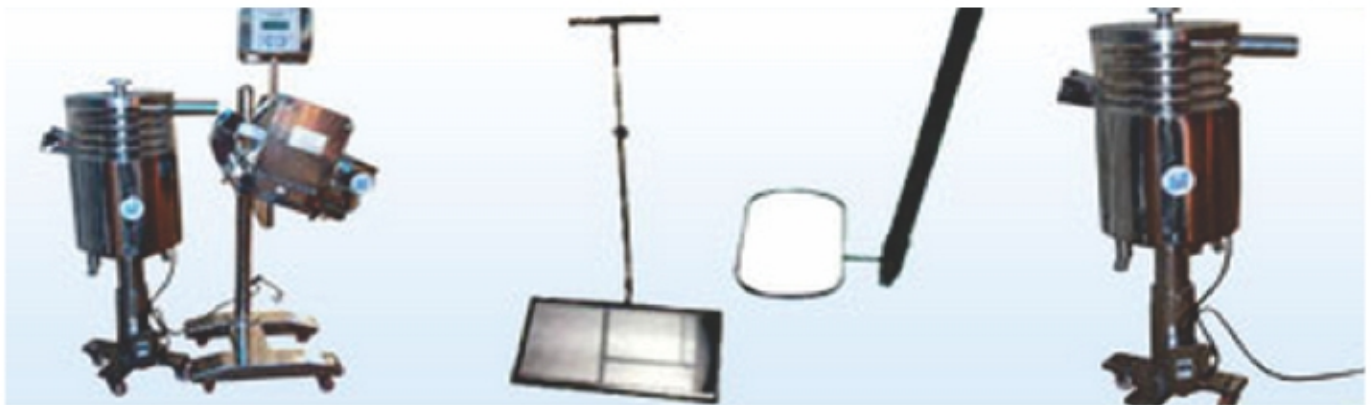

Security is absolute with this Metal Detector. Unique Door Frame Metal Detector is designed to detect both Ferrous and Non Ferrous Metals, which is passed through the aperture vicinity in any conceivable manner.

This Metal Detector is highly sensitive and are been used in the Jewellery manufacturing units and other various manufacturing units to protect the various unavoidable pilfering activities. This metal detector is ideal for customs, factories and all high security sites. All the Metal Detectors have a phase sensitive detection circuits which allows the user to enhance the sensitivity for certain group of metals and reduces it for others to a large extend.

Portable Search Light Metal Detector

We are engaged in the manufacturing and exporting of excellent quality Portable Search Light Metal Detector. The Portable Search Light Metal Detector manufactured and exported by us is made up of latest technology. It is highly efficient, time tested and influenced by our strong believe in quality manufacturing. Cost effectiveness is also a great feature of the range and we can also offer Wholesale Light Vibration Metal Detector to the clients.

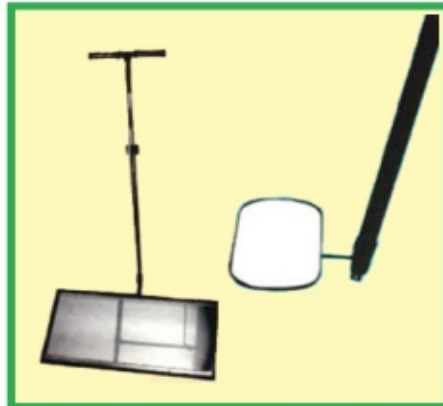

Gravity Feed Metal Detector

Unique Gravity Feed Metal Detector systems are designed to inspect any free flowing bulk powder or granular materials such as Pharmaceuticals, plastic pellets, cereals, flour and chemicals. Any free flowing materials may be passed through the vertical drop system. The unit fits into an existing pipeline or beneath a feed hopper and the product falls by gravity. The metal free product passes straight through the mechanism and diverts the ferrous and non ferrous and stainless steel contamination from the main floor. Rectangular and larger throughput systems are available to special order, suitable for floor or suspended mounting.

The high feed flap reject in the Gravity Feed Metal Detector ensures positive rejection of metal contamination every time unlike "Trouser Leg" when rejection of the good materials.
