ABOUT US

Established in the year 2022, we at Climate Detox Bio Energy Pvt. Ltd are a reliable manufacturer, exporter and supplier of biomass pellets. We are working as a reliable partner in sustainable energy solutions. We are based in Surat, Gujarat, India, and serve India, Europe, USA, UAE, UK, and Sri Lanka.

Our Mission

Our mission is to contribute to a cleaner and greener planet by providing eco-friendly and renewable energy sources. We believe in the power of the best level of innovation and even sustainability. Our present focus is on giving the best quality of premium biomass pellets that cater to different energy needs, ensuring effectiveness and environmental benefits.

As we move ahead, we are excited to announce our plans to manufacture these pellets, further enhancing our ability to give superior products and services to our clients.

Our dedicated team is zealous about endorsing green energy and reducing carbon footprints.

By selecting our products, you are making an important impact on the surroundings and supporting a sustainable future. The company is ready to give customised packaging and delivery solutions to the customers.

The company is professionally managed by Jinesh Patel, He holds a BE in electrical engineering, is a certified GHG verifier and has a total 15 years of experience in Renewable Energy.

Our Group Company Name

Climate Detox Pvt. Ltd

Year of Establishment

2022

Nature of Business

Carbon Asset Monitoring, Carbon Offset Solution, Sustainability Consulting, This-Party Service for Renewable Energy, Project Management Consultancy, Energy Audits and Feasibility Studies.

Biomass pellets are a renewable energy source made from organic materials like wood chips, agricultural residues, and sawdust. These compact, cylindrical pellets offer an efficient and sustainable alternative to fossil fuels. They are produced through a process of drying, grinding, and compressing the biomass, resulting in a dense, energy-rich fuel. Biomass pellets are used for heating, electricity generation, and industrial applications, providing a cleaner, carbon-neutral option compared to coal and oil. Their use helps reduce greenhouse gas emissions, supports waste recycling, and promotes sustainable forest management and agricultural practices.

BIOMASS PELLETS

Business Type	➔ Manufacturer, Exporter, Supplier
Raw Material	➔ Saw Dust & Agricultural waste
Color	➔ Brown
Form	➔ Pellets
Application	➔ heating, cooking and electricity generation
Length	➔ Up to 100 mm
Type	➔ Biomass Pellet
Thickness	➔ 6 mm & 8 mm
Ash	➔ < 5% (Saw dust) & <8% (Agriculture waste)
Country of Origin	➔ India
Moisture	➔ <6% (Saw Dust) & <8% (Agriculture waste)
GCV	➔ >4200 (Saw dust) & >3800 (Agriculture waste)
