biomass industry, addressing the increasing need for sustainable energy solutions. With a strong focus on innovation and quality, we offer products that meet the diverse needs of various industries while championing environmental responsibility.

Our product range includes 12mm Mustard Husk Pellets, 8mm Mustard Husk Pellets, and 90mm Biomass Briquettes, all crafted from agricultural residues. The 12mm and 8mm Mustard Husk Pellets are derived from mustard husk, a byproduct of mustard seed processing, and are designed to deliver high calorific value for efficient combustion. By utilizing mustard husk, we create value from agricultural waste and help reduce the environmental impact of residue burning, a significant concern in the farming sector.

The 90mm Biomass Briquettes we produce are versatile, suitable for a wide range of applications including industrial boilers and domestic heating systems. Made from various biomass materials, these briquettes offer a sustainable alternative to coal and other non-renewable energy sources. Known for their consistent quality, high energy output, and low
