

Excel Technocrats

Mfg.of. Coolant Filtration System
Design & Fabrication

*Best in quality
First in Service*

Custom metal fabrication

is best done under one roof **Excel Technocrats**

Company Over View

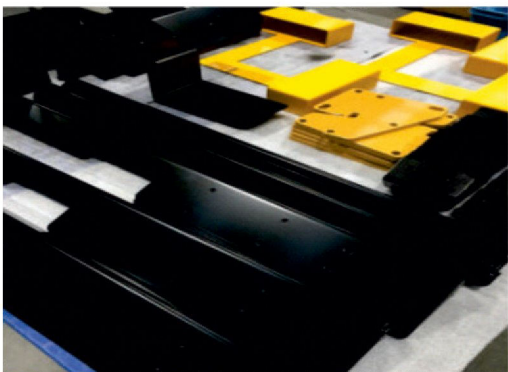

Excel Technocrats is a leading OEM Supplier to Industry of high Quality Precision manufacturing Steel Products.

We have experience in a wide range of key manufacturing industries and our partners span a variety of industries including Automotive, In frastructure, food process, Coolant Filtration Systems, Chip Conveyor & Several Manufacturing.

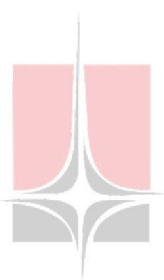

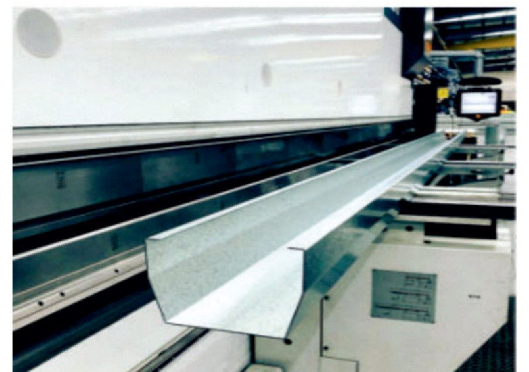

We Offer Complete precision Manufacture Solution & services to industry for project of any size & scale ,As industry demands and expectations changes, Excel Technocrats Continues to evolve & investing our capabilities, facilities & services.

Our Capabilities

- Precision Laser Cutting
- 6KW CNC Automated Fiber Laser Cutting
- CNC Press Brake up to 3.2Mtr on 5 Axis
- Plate Rolling
- Welding (Tig, Mig, Spot Welding)
- Sheet Metal Fabrication MS & SS
- Design
- Assembly
- Project Management

Laser Cutting

Process Development & Fabrication, Inc. is a preeminent provider of metal fabrication services for customers around the world. We use the latest technology to provide quality precision products with the utmost speed and efficiency. Our 10,000 square foot facility includes CNC forming, metal shearing, MIG & Tig welding, laser cutting. Our extensive selection of cutting tables allow us to provide superior laser cutting services to meet even the most complex and stringent specifications.

Laser Cutting Capabilities

Excel Technocrats have. 3000 x 1500mm laser tables that offer a broad range of laser parameters, giving us the ability to cut various parts without the use of extra tooling. By cutting holes or etching parts, we can ensure that you will have precision parts quickly and cost-effectively. we can handle small projects or large production runs with ease while still maintaining customer satisfaction. **Dynamic Fiber Laser 2000 Watt 6000 x 2500 Sheets**

Press Brakes for Metal Forming

Metal Forming

Excel Technocrats, offers a wide range of metal forming capabilities for the smallest projects up to large scale production parts. Each press is equipped with CNC controls, ensuring that each part is made with the same great precision, quality, and customer satisfaction each and every time.

Press Brakes for Metal Forming

Energy Mission 110 Ton Press

Indian and German tooling capabilities

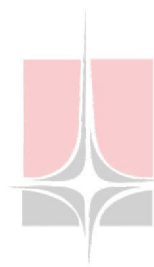

CNC controls

5 axis back gauge

3.2Mtr bed with 500mm Daylight Height

European precision ground segmented tooling

Perfect for forming sheet metal, plate and complex parts with ultimate precision

Welding and Fabrication Services

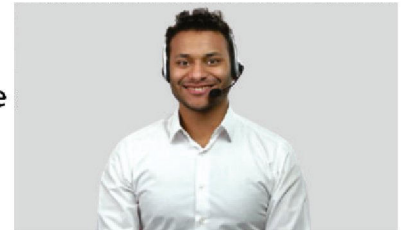

Excel Technocrats specializes in providing MIG and Tig welding by our certified welders, ensuring that our customers receive a quality and custom fabricated product each and every time. We have the ability to weld large and complex multi-part weldments and fixtures. Jig and Fixture for MIG welding allows us to cost effectively and accurately weld large production runs and repetitive welding procedures.

From collaboration to completion

Co-engineered Solutions. Our engineers collaborate with yours to ensure economies of scale and quick turnaround times. Our 3-D imaging technology allows us to reverse-engineer your drawings and find innovative ways to cut time and expense from its manufacture.

A Single point of contact. You'll have an assigned customer service representative dedicated to answering your technical as well as logistical questions.

Global Standards. Our Materials Testing Reports identify all materials and processes from source to completion. International projects adhere to all relevant standards as well.

Efficient Technology. We use the latest waterjet cutting technology to deliver precision cuts and faster than standard turnaround times. Benders that can do multiple bends and custom angles. Robotic and manual welders to give you the accuracy and durability that your project demands. For the perfect finish, we offer etching, powder coating and color matching.

Storage Savings. Thanks to our warehouse management, we can save you money on pieces you use in quantity-but deliver them as needed. So you'll have just in time product flow while enjoying the economies of longer production runs.
