Mithson Sealing Solutions – a subsidiary of FCS Fluoro Carbon Seals Group, is a manufacturer of Seals and Polymer components for Valves, Pumps and Hydraulics applications that best meet customer needs and wants, and provide both before and after sales service to ensure complete customer satisfaction.

We are one of the leaders in polymer engineering technology with over 25 years of historical legacy, manufacturing high performing polymer components for the Oil & Gas, Automotive, Life Science, Mining, Aerospace and beyond.

We are evolved with an engineering mindset and dedicated to the engineering design and manufacturing state-of-the-art reliable and durable precision sealing solutions that protect highly critical applications in the high stress environments.

We have an extensive experience in handling advanced materials – from Elastomers to advanced Fluoropolymers and Thermoplastics.

We are a trusted partner, easily approachable, very responsive, providing high performance, cost-effective solutions on-time and to your specification, around the world.

Our Vision

Our vision is to be recognized as a global leader in Polymer engineering Technology through commitment to Quality, Reliability & Customer Satisfaction

Quality

Our commitment and focus on continuous improvement in processes and product development ensure our customers get high-quality products since Quality is in our core DNA and it matters.

We emphasize quality at every stage of the product development life cycle. End to End: "Prototype to Production to Post-delivery support".

In order to meet the delivery, we rigorously monitor the process from material selection to the final finished product. We strive to meet customers' needs and expectations.
