Accredited method

The quantitative and chemometric evaluation of the NMR-Honey-Profiling™ Release 3.1.x is performed by Bruker BioSpin GmbH & Co. KG (Accreditation Certificate D-PL-22753-01-00) and the expert interpretation by QSI GmbH.

* Statistical confirmation of origin is only made if we have information in this regard. It is based on the NMR database and does not necessarily agree with the results of a microscopic pollen analysis (reference method).

Conclusion:

Based on the current Honey-Profiling™ database of Bruker BioSpin GmbH & Co. KG and the interpretation of QSI, the NMR profile gives no indication of the presence of foreign sugars.
