YEARS OF EXCELLENCE

FLEXIBOND®
AN ATTACHMENT

FLEXIBOND is a leading ACP manufacturing company. Since its inception in the year 2002, it has been ruling the industry with its innovative products. The organization is proud to stand on the pillars of hard-earned goodwill. FLEXIBOND has created a rich legacy for the brand with an avant-grade product line that has distinctive products used for interior, exterior, facade, furniture and signage applications.

Two decades back, there were very few companies in the market that were manufacturing ACP sheets and FLEXIBOND was amongst the top 4 companies serving the sheets. It was the year 2009 that witnessed the commencement of a new product line of free-foam PVC sheets at FLEXIBOND. This marvel from the house of FLEXIBOND gave a new shape to the signage industry as it is altogether more durable, flexible and also aesthetically rich. FLEXIBOND expanded its product realm in the year 2010 with the production of Celuka PVC/WPC foam board; a contemporary replacement of conventional wood used in the furniture industry. This new product created a unique space for itself in the market since it has all the necessary virtues. As FLEXIBOND believes in long-time relationship, we continue to focus on providing quality products to architects, designers and end customers.

All these products are developed in an eco-friendly manner. We also contribute towards sustainable development. Which is why our products are accredited with ISO 9001:2015, ISO 14001:2015 and OHSAS 18001:2007. Besides, we are also given the honor of being a part of Indian Green Building Council.

Metallic & Solid Series

FLEXIBOND produces Metallic and Solid colors, which are produced in a triple coat with color variants, gloss retention, excellent surface flatness, featherly smoothness and extremely light in weight. It has a roller coating of 70% fluorocarbon KYNAR 500 PVDF resin. Also, it has a top clear coat which gives a lustrous surface, due to which different lighting and viewing angle highlights its richness. Hence, they are preferred when a uniform appearance without effects is required or in the case where certain areas are highlighted in the form of niches of the building like facade or signage.

Give your exteriors a definition of high end style with a product range that is par excellence

NEVER RUN OUT OF TIME
DURING ANY FIRE EMERGENCY

Fire Shield FR Grade

We have developed Fire Shield/FR (B1) Aluminium Composite Panel which is composed of two skins of aluminium laminated to either side of a mineral-filled thermoplastic core. As the name suggests, it will work as your armour to combat fire-related issues. The Aluminium surfaces are color-coated with advanced fluorocarbon PVDF and next-generation fluorocarbon FEVE resin in a variety of finishes and colors. It is manufactured with more than 70% of Non-Halogen kind of mineral content with high strength color-coated aluminium coil alloy from Series AA5000/AA3000. Fire Shield/FR fulfills the standards of EN 13501-1, Class B-s1, d0, BS 476 Part 6 and 7 and DIN-4102.

FR A2 Grade Available on Request

Technical Specification

Panel's Physical Properties

Product Grade	Panel Thickness	Coil Thickness	Core Thickness	Top Coil Coating Thickness	Back Coil Coating Thickness
FLX-450-Platinum	4.0 mm	0.50 mm	3.0 mm	26 μ \pm 2 μ Beckers/PPG Germany	7 μ \pm 2 μ Primer Coat
FLX-425-Gold	4.0 mm	0.25 mm	3.5 mm	26 μ \pm 2 μ Beckers/PPG Germany	7 μ \pm 2 μ Primer Coat
FLX-325-Gold	3.0 mm	0.25 mm	2.5 mm	26 μ \pm 2 μ Beckers/PPG Germany	7 μ \pm 2 μ Primer Coat

Product Tolerance

Width	\pm 2.0 mm	Coil Thickness	\pm 0.02 mm
Length	\pm 4.0 mm	Panel Thickness	\pm 0.20 mm
Squareness	Maximum 5 mm	Bow	Maximum 0.5 % of width and/or Length

Surface defect : Surface shall not have any irregularities such as roughness, buckling and other imperfections.

Standard Dimension

Thickness: 3 mm & 6 mm

Size: 1220 x 2440 mm | 1220 x 3050 mm | 1220 x 3660 mm
(Special Thickness and Sizes Available on Request)

■ Silver | ■ Gold | ■ Platinum

FR GRADE MATERIAL AVAILABLE ON REQUEST.

Important Note

To avoid possible reflection differences, it is recommended to install the panel in the same direction as marked on the protective peel-off film. Color may vary from batch to batch, kindly ask for a sample. For installation, please follow the international standards.
