FR GRADE MATERIAL
AVAILABLE ON REQUEST

HPL [available]

High-pressure laminate [HPL] is manufactured using aluminium coil with double layered PVDF/Lumiflon coating that is resistant to dust. It has a polyethylene core that makes it resistant to water, fungus and termite. It is more durable and efficient than wood in terms of its long-lasting lifespan and charm.

Important Note

To avoid possible reflection differences, it is recommended to install the panel in the same direction as marked on the protective peel-off film. Color may vary from batch to batch, kindly ask for a sample. For installation, please follow the international standards.
