Poly Dynamics is an exclusively Indian owned enterprise which was one of the first group to introduce manufacturing of water floating system into India on name of Poly Dynamics.

This Pontoon cube is widely applied as floating docks, platforms for yachts, boats, motor-boats, ferry, floating bridge, swimming pool, show stages, floating wooden house as well as fish culture net cage. Our pontoon cubes are environmental friendly without any kind of pollutions, easy assembling and disassembling modular system, stable and secure on the water surface, aesthetically beautiful with various colour combinations. According to the site conditions, our construction teams are capable to offer a total & professional solution suitable to meet customers' needs, including planning, conception, R&D, manufacturing & installation.

Environment Responsibility:

For our company the environment has always been a priority and by purchasing a our modular dock you choose an ecological solution. Our Floating docks are made of a high quality resin that is 100% recyclable and will not degrade in the environment. It is also resistant to a large number of chemicals. The exceptional durability of our products make it an ideal choice because during its life span you would have bought 2-3 Aluminum steel or wooden docks. Aluminum requires a lot of energy for its production and wood is a resource that requires many years to regenerate and must be protected every year with highly polluting chemicals.

These factors don't even take into account the ever increasing number of docks that are destroyed and replaced every year by increasingly worse weather conditions. Our modular docks resist the most severe weather conditions in the world! Our docks have a low profile on the water and our colors blend easily into the environment.

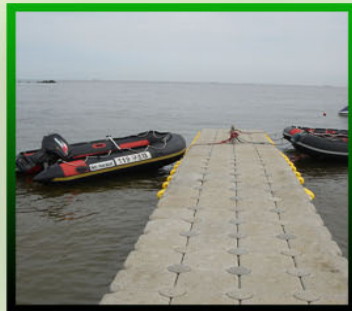

Turnkey Projects :

PD is the company in the modular floating system business to offer you a turn key service for all your projects. PD can manufacture according to your requirements any accessories or equipments adapted to your specifications. The result is a turn key solution letting you deal with one supplier make you save time, money and effort. The risks of non-compatibility between our products and other equipments is therefore eliminated.

Furthermore, Our Company has qualified persons to help you with complete project supervision and has extensive experience quality of recognized our installations, products and service is worldwide.

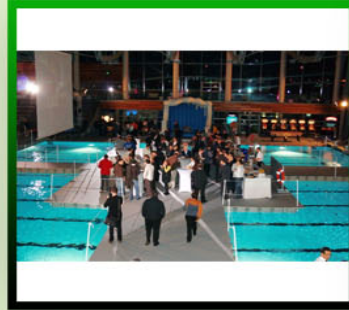

Choosing Poly Dynamics is choosing a successful and problem free project. Keep your stress level low.
