

**+91 9849 70 8003**

Our team is also dedicated to maintaining the highest standards of health and safety on every project. We have a comprehensive health and safety management system in place, and all our operatives are fully trained in the latest health and safety regulations. We also conduct regular safety audits and inspections to ensure that our equipment and procedures meet the highest safety standards.

In addition to our skilled workforce and state-of-the-art equipment, we also place a strong emphasis on sustainability and environmental responsibility. We strive to minimize the environmental impact of our demolition projects by recycling and reusing materials whenever possible, and we adhere to all relevant environmental regulations and best practices.

Overall, our demolition team is committed to delivering exceptional results on every project, no matter the size or complexity. With our highly skilled and experienced workforce, top-of-the-line equipment, and unwavering dedication to safety and sustainability, we are confident in our ability to meet and exceed our clients' expectations.

**Demolition Contracting:** Our mainstay, demolition contracting, includes interior demolition, selective structural demolition for seismic retrofits, selective demolition for building renovations, bridge removals and complete building demolition/facility decommissioning projects. In addition to demolition services we perform excavation, dowel drilling/setting and concrete surface preparation on building and bridge retrofit projects.

Our team is experienced in handling projects of all sizes, from small interior demolition jobs to large-scale building and bridge removals. We are committed to safety and environmental responsibility, ensuring that all demolition and excavation work is done in compliance with regulations and best practices.

We have the equipment and expertise to handle even the most challenging demolition projects, and our team is dedicated to completing projects on time and within budget. Whether it's a selective demolition for a building renovation or a complete facility decommissioning, we have the skills and experience to get the job done right.

Our excavation services include site preparation, earthmoving, and trenching for utility installations. We also specialize in dowel drilling and setting for structural retrofit projects, as well as concrete surface preparation for new construction or renovation projects.

At our core, we are a demolition contracting company, but our range of services and expertise make us a valuable partner for any construction or renovation project. We are committed to delivering high-quality work and exceptional service to our clients, and we take pride in our reputation for reliability and professionalism.
