About Us

Where Innovation Meets Sustainability

For years, Insignia Projects has stood as a trusted name in the packaging industry, known for reliability, innovation, and uncompromising quality. As pioneers in Pulp Moulded Packaging, we convert recycled paper into durable, eco-friendly packaging solutions that protect products while reducing environmental impact. Through our years of experience, we've mastered the art and science of pulp moulding, delivering solutions that balance strength, sustainability, and precision.

Why Choose Us

PRECISION

RELIABILITY

INNOVATION

SUSTAINABILITY

A Trusted Partner for Sustainable Growth.

At Insignia, we manufacture eco-friendly packaging from 100% recycled paper, using advanced pulp moulding technology. Each product is designed to be biodegradable, functional, and efficient, offering the perfect balance between environmental responsibility and superior performance.

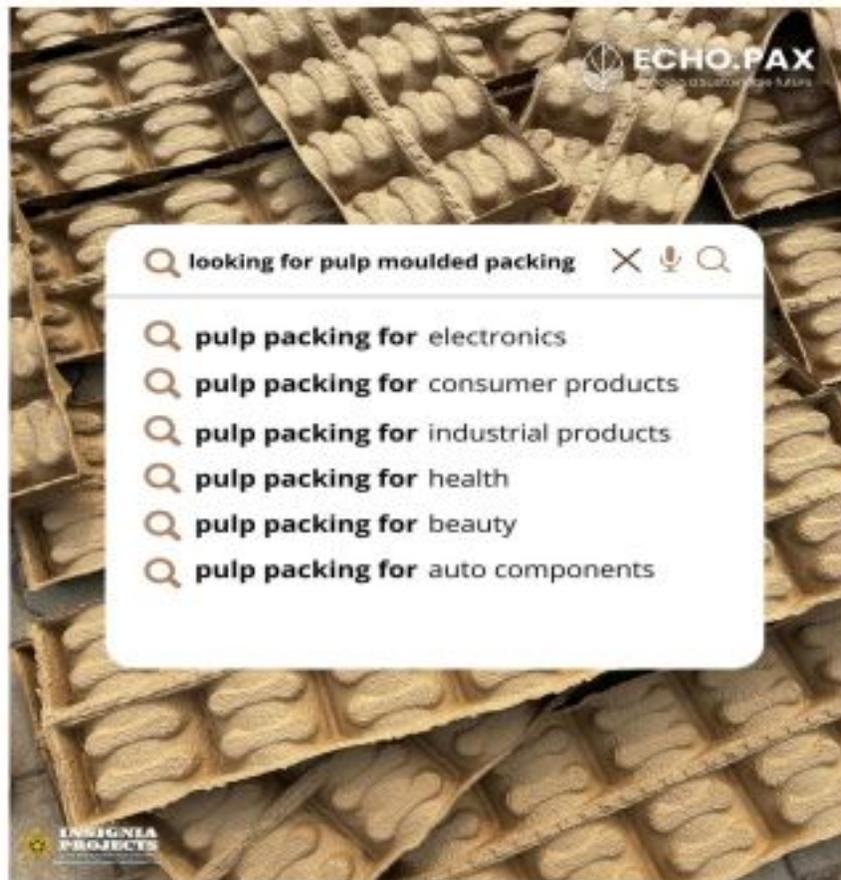

From concept to creation, we ensure precision at every stage design, moulding, drying, and delivery.

Our long-standing relationships with leading brands and manufacturers are built on trust, consistency, and innovation.

Clients choose Insignia Projects because we offer:

- *Proven Industry Expertise*
Backed by years of manufacturing excellence.
- *Customized Solutions*
Packaging tailored to exact product dimensions.
- *Sustainable Innovation*
100% recycled and biodegradable materials.
- *Reliable Delivery*
Scalable production capacity with assured quality control.

Our Product Portfolio

Designed to Protect. Built to Last.

Our product range embodies our commitment to durability, functionality, and sustainability. From pulp-moulded trays and inserts that safeguard electronics and consumer goods, to egg trays and cup holders ensuring secure transport, every design serves a purpose. Our shoe inserts and shapers preserve form and structure, while nursery pots and garden trays nurture growth in the most natural way. For heavier applications, our protective industrial packaging delivers reliable strength without compromising on environmental responsibility.

Each product reflects our unwavering focus on design integrity, material strength, and environmental accountability — the core of everything we create.

Our range is built to serve diverse needs — responsibly. Here's a glimpse into what we create:

Our Process

- **Recycling**
- **Pulp Formation**
- **Moulding**
- **Drying & Finish**
- **Quality Assurance**

From sourcing waste paper, to creating fibre slurry, to pressing into moulds and finishing the product, our process ensures that every package meets strict standards for durability, fit and finish.

Clients benefit from lower damage rates, stacked storage efficiency and improved sustainability credentials.

Sustainability Commitment

At Insignia Projects, sustainability is more than a buzzword. It is our operational manifesto. We repurpose nearly 5 tons of recycled paper per day, converting post-industrial waste into high-value packaging instead of letting it end up in landfill.

By choosing our solutions, you align your brand with the circular economy: less plastic, fewer emissions, cleaner supply chains and stronger brand credentials.
