ABOUT US

B.R Poultry Appliances is a dedicated manufacturer, supplier, and exporter of high-quality poultry incubator machines, components, and hatchery accessories. Established in 2025, the company is founded and guided by Mr. Santosh Kumar Ram, with a clear vision to support modern poultry farming through reliable and efficient incubation solutions.

We specialize in a wide range of incubator control panels and electronics, heating components, motors and drive systems, air circulation parts, trays and egg handling equipment, sensors, switches, valves, and structural accessories. Each product is designed to ensure accurate temperature control, proper humidity regulation, smooth egg turning, and long-term operational reliability.

At B.R Poultry Appliances, we emphasize quality manufacturing, precise engineering, and strict testing standards to meet the demanding needs of commercial hatcheries and poultry farms. Our solutions are trusted for their durability, performance, and ease of maintenance. With a customer-focused approach and commitment to continuous improvement, we aim to deliver dependable poultry incubation solutions to domestic and international markets.
