• ABOUT US •

EXPORTER, SUPPLIER, TRADER

Guru Nanak Farming is a dedicated agricultural manufacturing company established in 2025, headquartered in Panipat, Haryana, India. The company specializes in producing high-quality organic fertilizers designed to support sustainable farming and improved soil health across India.

Operating as a Manufacturer and Supplier, Guru Nanak Farming provides premium-grade Earthworm Fertilizer, Brown Vermicompost Fertilizer, and Organic Vermicompost Fertilizer to farmers, agricultural distributors, nurseries, and horticulture businesses across Pan India. Our fertilizers are processed using natural composting techniques that enhance nutrient availability, improve soil structure, and promote environmentally responsible farming practices.

We follow systematic production methods under controlled conditions to ensure consistent nutrient composition, moisture balance, and purity. Our vermicompost products are rich in essential macro and micronutrients, supporting better crop yield, improved root development, and long-term soil fertility. Strict quality monitoring is implemented at every stage—from raw material selection to packaging and dispatch—to maintain uniform standards.

Strategically located in Haryana's agricultural belt, we maintain strong sourcing networks and efficient logistics to ensure timely delivery to our customers. We emphasize transparent business practices, competitive pricing, and long-term partnerships built on trust and reliability.
