# Company Introduction

Zigma Technologies has established in 2006 with an aim to provide sales, service/repair support for UPS, Drives, Solar on grid and off grid systems, Rack ATS, PDU, Automation PLC, Industrial Field instruments, Switchgears and DCS system. We also do hands on LVS systems; Drives manufactured by Schneider electric and ABB India limited have made a mark in the industry as high quality and reliability products. We have a long history and many years of quality customer service as a provider of guaranteed electronic component repairs and refurbishing of Industrial Electronic Boards. Using state of the art equipment, we are able to troubleshoot problems down to the component level, which often enables us to provide repairs at a cost lower than those of replacement parts. Additionally, we maintain an extensive inventory of replacement parts which ensures a quick turnaround on all repairs.

Since its inception the Company has emerged as a leading service provider of UPS, solar and distribution solutions ranging from design and consultancy to contract manufacturing (Outsourcing), Zigma Tech has pioneered in offering diversified cost effective and quality power services. The portfolio was further elaborated by diversifying into new products such as Solar on grid /Off grid, Commissioning of HVAC panel, engineering design, calibration of field device, AMC, rental and Battery sales of different makes.

## After Sales Channel Partner

- We can be the complete after sales channel partner right from site readiness, installation / commissioning to taking care of the equipment even after warranty by providing comprehensive contracts (AMC) covering labor and parts .

## Reverse Logistics Support

- We can provide complete reverse logistics support ranging from pickup of defective items from site, repair/refurbish and commission it at site or simply dispatch it to the destination that the customer specifies
