A SAFE & SURE Grip In DIARRHOEA

N-TZ

Norfloxacina penetrates into the bacterial cells much readily exerts a potent bactericidal effect by inhibition of the a sub unit of bacterial DNA gyrase an essential enzyme involved in DNA replication, precipitating a sequence of event leading to lysis of the bacteria.

Excretion occurs both in urine as well as in faeces.

N-TZ is good for bacterial diarrhoeas because high concentration are present in the gut and, anaerobic flora is next disturbed.

Duration of action is longer thus it is more suited for single dose or once daily therapy in some amoebiasis. cure any latent hepatic infection.

Tinidazole

"Only three words can check a diarrhoea N-TZ"
