# Laryngoscope Green System Fibre-Optic LED

a **BRIGHT** idea that has **LED** all the way

- Ultra Bright LED Illumination provides White light ensuring true tissue color for accurate identification of trachea & landmarks.
- Cool White light as compared to heat emitting yellow light bulb.
- Reliable, over 30,000 hours of light output.
- Energy Efficient, low power consumption means longer battery life.
- Compatibility with all disposable, reusable Green System fibre optic blades.
- Economical; a great value when you compare to our competition.

Standard Handle

Accepts two size "C" 1.5 V cells.

6601
